Keiser University continually reviews, improves and updates its programs, courses and curricula. It is incumbent on the University to reflect these revisions in its publications. The following *Addendum No.2* represents additions, changes and deletions to the 2011-2012 Keiser University Catalog, August 2011 Edition, Volume 11, No. 1, and is effective January 5, 2012.

PAGE 14, ACCREDITATION

Replace the fifth bullet with the following:

- Keiser University's Medical Assisting program, Ft. Lauderdale, Lakeland, Melbourne, Pembroke Pines, Tallahassee, Tampa, and Sarasota campuses are accredited by the Accrediting Bureau of Health Education Schools, 7777 Leesburg Pike, Suite 314N, Falls Church, VA 22043, (703) 917-9503.

PAGE 15, ACCREDITATION

Replace the second bullet with the following:

- Keiser University's Nursing program, Jacksonville, Ft. Lauderdale, Kendall, Lakeland, Melbourne, Orlando, Sarasota, Tallahassee and West Palm Beach campuses, is accredited by the National League for Nursing Accrediting Commission, 3343 Peachtree Road NE, Suite 850, Atlanta, Georgia 30326, 1-866-747-9965 (toll free #), www.nlnac.org.

Replace the Occupational Therapy section with the following:

Keiser University's Occupational Therapy Assistant program, Ft. Lauderdale, Miami-Kendall, Melbourne, Orlando, Pembroke Pines, Jacksonville, Daytona, Tallahassee, Tampa and West Palm Beach campuses, are fully accredited by the Accreditation Council for Occupational Therapy Education (ACOTE) of the American Occupational Therapy Association (AOTA). The Fort Myers campus has been granted "developing program status" during the year 2012-2013. ACOTE can be reached at Accreditation Council for Occupational Therapy Education, 4720 Montgomery Lane, or P.O. Box 31220, Bethesda, Maryland 20824-1220, (301) 652-AOTA www.acoteonline.org.

Replace the two Physical Therapist Assistant sections with the following:

- The Physical Therapist Assistant Programs at Keiser University's Fort Lauderdale and Sarasota Campuses are accredited by the Commission on Accreditation in Physical Therapy Education (CAPTE), 1111 North Fairfax Street, Alexandria, Virginia 22314; telephone:(703) 706-3245; email:accreditation@apta.org; website: www.capteonline.org.
- The Physical Therapist Assistant Programs at Keiser University's Jacksonville and Lakeland Campuses have been granted Candidate for Accreditation status by the Commission on Accreditation in Physical Therapy Education (1111 North Fairfax Street, Alexandria, VA, 22314; phone: 703-706-3245; email: accreditation@apta.org). Candidacy is not an accreditation status nor does it assure eventual accreditation. Candidate for Accreditation is a pre-accreditation status of affiliation with the Commission on Accreditation in Physical Therapy Education that indicates the program is progressing toward accreditation.

PAGE 19, ARTICULATION AGREEMENTS

Insert the following new section:

Articulation Agreements

In an effort to make the transition from institutions as effortless as possible, Keiser University maintains articulation agreements with various institutions of higher learning. Please contact the Vice Chancellor of Academic Affairs at the Office of the Chancellor for a current listing.

PAGE 34, TRANSFER STUDENTS WITH BACHELOR DEGREES

Replace this paragraph with the following:

Students who possess a Bachelor of Science or Bachelor of Arts degree from a regionally accredited institution and who wish to pursue an additional undergraduate degree will be considered to have met ALL the general education requirements of the University.

PAGE 63, CAMPUS SAFETY

Replace the paragraph above “Annual Security Report” with the following:

Keiser University maintains open, well-lit buildings with appropriately well-lit parking areas. Any and all incidents including damage to personal property or suspicious persons should be reported promptly to University administration.

“Nothing herein precludes any student, staff or faculty from contacting the appropriate authorities directly in the event they feel in threat of physical harm or imminent danger. In cases of emergency, dial 911.”

PAGE 78, GORDON RULE

Replace this section with the following:

The State Board of Education Rule 6A-10.30(2), commonly known as the “Gordon Rule,” specifies that all state universities require, in all baccalaureate and associate of arts degree programs, completion of twelve (12) semester credit hours of general education coursework in which all students produce sufficient written work to ensure adequate writing skills.

It is a Keiser University policy to comply with this Rule, and courses at Keiser University requires 4,000 written words per course. At Keiser University, Gordon Rule writing courses are as follows:

American and/or English Literature AML1000 or ENL1000 4,000 words/course
 English Composition I and/or II ENC1101 or ENC2102 4,000 words/course
 Introduction to Psychology and/or Sociology PSY1012 or SYG1000 4,000 words/course

Satisfactory completion is a grade of “C” or higher.

PAGE 80, UNIVERSITY WITHDRAWAL

Replace this section with the following policy:

University Withdrawal Policy

When a student withdraws from Keiser University, oral or written notice should be given to the Dean of Academic Affairs or the Campus President by the student, parent or guardian. Such notice should contain the reason for the withdrawal.

The student has a responsibility to notify the University of their intent to withdraw and indicate the date of the withdrawal. If the student plans to return to school, this should be indicated to the Dean of Academic Affairs or the Campus President during this process.

A student who withdraws and does not notify the University of their intent to return must be withdrawn within 14 days of the last date of attendance. In addition, any student who has not attended class within 14 days must be withdrawn.

The above policy will affect the student's grade based on the following:

- Withdrawal prior to 50% completion of the course, a grade of W will be assigned.
- Withdrawal after 50% completion of the course, a grade of F will be assigned.

PAGES 82-83, GRADING

Remove the letter grade "WF" from the Grading Scale.

Add note to Grading Scale as follows:

Students will also be assigned a grade of "F" for withdrawing after attending 50% of a course and not taking the final examination.

PAGE 84, SATISFACTORY ACADEMIC PROGRESS

Replace the academic year definition with the following:

An academic year is defined as two semesters equivalent to 32 weeks of instruction and at least 24 semester hours.

PAGE 87, SATISFACTORY ACADEMIC PROGRESS

Delete the following from the list of allied health programs:

Health Information Management
Histotechnology

Replace this section with the following:

ALLIED HEALTH PROGRAM SATISFACTORY PROGRESS AND PROGRAM CONTINUATION

SATISFACTORY PROGRESS AND PROGRAM CONTINUATION

The Allied Health Program has a set grading standard designed to assist graduates in achieving passing scores on the national certification examination and to demonstrate that the required core competencies have been achieved.

To enter the Allied Health program core component, the student must achieve a minimum cumulative GPA of 3.0, (on a 4.0 scale) in all general education courses. Earning a grade of "D" or "F" in any general education course, and/or not attaining a cumulative GPA of 3.0 (on a 4.0 scale) in the general education component will prevent the student from entering the program core. The student may elect to repeat a general education course in which a grade of "D" or "F" was received. Transfer credits from another institution will be calculated into this required general education cumulative GPA for admission into the program core.

To continue satisfactory progress in the Allied Health program, the student must achieve a minimum cumulative core GPA of 2.50 in the professional courses after completion of the first semester. If the student does not meet the required cumulative GPA of 2.50 for the first core semester the student will be placed on probation for the second core semester.

At the end of the second core semester all students must achieve a minimum core cumulative GPA of 2.75 to continue in the program or a core semester GPA of 2.75 to continue in the program on probation. Students who do not meet the second semester GPA, either core cumulative GPA or core semester GPA, will be dismissed from the program. A minimum cumulative GPA of 2.75 is required for subsequent semesters in order to continue in the program.

A student who has been dismissed from the program for failure to maintain a cumulative GPA of at least 2.75 will be offered a one-time opportunity to re-start the program in a probationary status from the beginning; after waiting out one full semester. However, acceptance for program re-entry is contingent upon not exceeding the program's maximum capacity. The student will be placed on the wait list and await their new programmatic start date. Grades earned for previously taken core courses will not be considered in calculation of core GPA.

Students reentering from dismissal who do not meet the minimum cumulative core GPA requirement of 2.50 for the first semester and/or cumulative core GPA of 2.75 for the second semester may continue on probation for one additional semester even though their core cumulative GPA is below 2.75 provided he/she meets the minimum semester GPA of 2.75. Students must meet a cumulative core GPA of 2.75 for all subsequent core semesters in order to continue in the program. Students who do not meet the 2.75 cumulative core GPA requirement for subsequent core semesters will be permanently dismissed from the program.

For the purposes of this Allied Health SAP policy, a core semester is defined as the completion of 4 consecutive core classes (i.e., ABCD term order). The Allied Health SAP semester may differ from the established University SAP semester and does not recognize W or WNA in the grade calculation. Allied Health SAP is based on qualitative measures and will be evaluated every 4th core course, after the completion of the final term of each core semester.

A student who fails a course within a core semester may choose to re-enter the program when the course re-sequences. The failing grade will only be replaced when and if the student earns a passing grade. SAP calculation will include 4 consecutive courses, bridging terms, to meet the established core semester for which the student has re-entered. The student must meet the same core semester GPA requirements as previously stated. Should a student be out of an Allied Health program for an extended length of time (as determined in the program's Student Handbook) then the student will be required to re-apply to the program and start the core from the beginning. Grades earned for previously taken core courses will not be considered.

Delete the following:

**Students enrolled in the Histotechnology program are not required to complete general education courses prior to beginning the Histotechnology core courses. Therefore, these students are not required to achieve a minimum cumulative GPA of 3.0 in all general education courses prior to entering the program core component.*

PAGE 91, REGISTRY AND LICENSURE EXAMINATIONS

Add the following verbiage:

Individual programmatic requirements as stated in the programmatic handbooks supersede the policies published in the Keiser University Catalog.

EDUCATION SPECIALIST DEGREES

EDUCATIONAL LEADERSHIP

Education Specialist Degree

Program Description

Keiser University’s Education Specialist degree in Educational Leadership prepares reflective scholars and capable professionals who apply theory and method to dynamically improve schools under their leadership and, ultimately, the communities they serve. The program fosters lifelong learning and values leadership, ethical and informed decision-making, diversity, program evaluation, effective communication, and technology.

Program Objectives

Keiser University’s Education Specialist degree in Educational Leadership program enables students to contribute to the education profession through independent learning, scholarship, and research. Upon completion of this program, students are able to:

- Apply leadership theory and ethical, reflective decision-making to manage and administer schools and school systems.

- Evaluate and apply best practices in instruction using effective teaching practices, emerging technologies, and assessment techniques to achieve optimal educational outcomes.
- Create a shared vision of a learning culture by understanding and responding to the political, social, economic, legal and cultural environment.
- Respond to diverse communities of interest to create a safe, efficient, and effective learning environment.
- Continue to renew and develop expertise in the field of leadership demonstrated by effective written, spoken, and digital communication.

Prerequisites for Major Courses

- Master degree from an accredited institution

NOTE: Courses in the Education Specialist program are eight-weeks in length and students are scheduled for one or two courses concurrently.

Program Outline

To receive an Education Specialist degree, students must earn 30 graduate semester hours. Twenty-four of the program hours must be completed through Keiser University. Students must pass a Comprehensive Examination at the completion of coursework. Program requirements are as follows:

Educational Specialist in Educational Leadership Major Core Courses (30.0 credit hours)

Foundation Courses (18.0 Credit Hours)

EDU712	Policy, Politics, and Community Relations	3.0 credit hours
EDU710	Ethical and Legal Issues in Education/Leadership	3.0 credit hours
IDT720	Designing Training and Performance Solutions	3.0 credit hours

INSTRUCTIONAL DESIGN AND TECHNOLOGY

Education Specialist Degree

Program Description

Keiser University's Education Specialist degree in Instructional Design and Technology prepares reflective scholars and capable professionals who apply instructional systems design, theory, tools, and technologies to achieve desired educational and training outcomes in various settings. The program fosters lifelong learning and values leadership, ethical and informed decision-making, diversity, assessment, program evaluation, effective communication, and technology.

Program Objectives

Keiser University's Education Specialist degree in Instructional Design and Technology program enables students to contribute to the education and training profession through independent learning, scholarship, and research. Upon completion of this program, students are able to:

- Create a shared vision of a learning culture by understanding and responding to the political, social, economic, legal and cultural environment.
- Respond to diverse communities of interest to create a safe, efficient, and effective learning environment.
- Continue to renew and develop expertise in the field of instructional design technologies demonstrated by effective written, spoken, and digital communication.
- Evaluate and apply current practices in course, program, and training development using effective instructional design and models supporting technology-based learning in various instructional situations.
- Evaluate and assess a range of technology-based learning models and integrate the use of effective technologies in supporting learner success.
- Explore and extrapolate implications in the advancement of future technologies in education and training on a global basis.
- Apply the skills and knowledge required in the use of multimedia applications in the development of training and learning activities.

Prerequisites for Major Courses

- Master degree from an accredited institution.

NOTE: Courses in the Education Specialist program are eight-weeks in length and students are scheduled for one or two courses concurrently.

Program Outline

To receive an Education Specialist degree, students must earn 30 graduate semester hours. Twenty-four of the program hours must be completed through Keiser University. Students must pass a Comprehensive Examination at the completion of coursework. Program requirements are as follows:

Education Specialist in Instructional Design Technology Major Core Courses (30.0 credit hours)

PAGE 109, BUSINESS ADMINISTRATION, DOCTOR OF PHILOSOPHY DEGREE

Change subheading to "Doctor of Business Administration Degree".

Replace this section with the following:

Program Description

The Doctor of Business Administration Degree provides experienced business professionals and future members of academia with the skills to apply business/management theories, methods, and research to dynamically improve the organizations and communities they serve. The program emphasizes the development of new knowledge through both theory and applied research for application in the global environment. The Doctor of Business Administration degree program promotes advanced decision-making and leadership skills, lifelong learning, ethical and informed decision-making, effective communication, sustainability, and the use of information technologies in the global business management environment. Doctoral students specialize in one of three areas. These include: Marketing, Global Organizational Leadership, and Global Business.

Program Objectives

Keiser University's Doctor of Business Administration degree program enables students to contribute to the business profession and the business/educational profession through independent learning, scholarship, and research. At the conclusion of the program, doctoral students will:

- Apply and evaluate effective leadership and decision-making practices at complex, multifaceted, and global organizations
- Formulate and disseminate organizational goals and strategies with data through versatile information systems
- Have the ability to prepare and evaluate ethical informed business decisions using advanced research methods, and communicate effectively at various organizational levels, in a global business environment
- Be educated to enhance their awareness and improve their ability to meet the opportunities and challenges in the global business environment
- Be prepared to contribute to the body of knowledge as part of the research community for application in the global business environment
- Be prepared for careers as university researchers and teachers or for senior positions in business or government

Prerequisites for Core Courses

- Master degree in business administration, management, public or non-profit management, or related field that demonstrates exposure to managerial functions from an accredited institution and (2) two years of full-time managerial or professional experience; or Master degree from an accredited institution and at least (3) three graduate credit hours or (6) six undergraduate credits hour in each of the following: accounting, finance, and economics, and three years and preferably (5) five years of full-time managerial or professional experience.

NOTE: Courses in the DBA program are eight-weeks in length and students are scheduled for one or two courses concurrently. Dissertation courses are eight-weeks in length.

Program Outline

Students are required to select one of the three specializations. Students take seven core courses for 21 credit hours (common to all specializations), 9 credit hours in research, 18 credit hours in their respective specialization, and 12 hours in the dissertation.

To receive a Doctor of Business Administration degree, students must earn 60 graduate semester credit hours. Fifty-four of the program hours must be completed through KeiserUniversity. Program requirements are as follows:

Doctor of Business Administration Major Core Courses (60.0 credit hours)

Core Courses (21.0credit hours)

DBA700	Foundations in Business Research Writing (prerequisite)	3.0 credit hours
DBA710	Management and Leadership Approaches	3.0 credit hours
DBA720	Global Business	3.0 credit hours
DBA730	The Global Economy	3.0 credit hours
DBA740	Financial Theory and Policy	3.0 credit hours
DBA750	Marketing Management	3.0 credit hours
DBA760	Strategic Decision Making for Managers	3.0 credit hours

Research Courses (9.0credit hours)

DBR800	Methods and Analysis of Quantitative Research	3.0 credit hours
DBR810	Methods and Analysis of Qualitative Research	3.0 credit hours
DBR811	Mixed Methods	3.0 credit hours

Marketing Specialization (18.0credit hours)

MKT851	Emerging Issues in Marketing	3.0 credit hours
MKT852	Seminar in Global Marketing	3.0 credit hours
MKT853	Seminar in Marketing Models and Theory	3.0 credit hours
MKT854	Consumer Behavior Theory and Practice	3.0 credit hours
MKT855	Strategic Service Marketing	3.0 credit hours
MKT856	Seminar in Research Analysis for Marketing Decisions	3.0 credit hours

Global Organizational Leadership Specialization (18.0credit hours)

LDR811	In-Depth Exploration of Organizational Behavior	3.0 credit hours
LDR812	Analysis of Management History, Theory, and Leadership I	3.0 credit hours
LDR813	Leading in the 21 st Century	3.0 credit hours
LDR814	Transformational Leadership	3.0 credit hours
LDR815	Emerging Leadership Practices	3.0 credit hours
LDR816	Analysis of Management History, Theory, and Leadership II	3.0 credit hours

Global Business Specialization (18.0credit hours)

INB821	Cross Cultural Management & Negotiations	3.0 credit hours
INB822	Global Finance Management	3.0 credit hours
INB823	Global Strategic Management	3.0 credit hours
INB824	Global Business and Technology	3.0 credit hours
INB825	Global Supply Chain Management	3.0 credit hours
INB826	Advanced Topics in Global Management	3.0 credit hours

Dissertation Courses (12.0credit hours)

Students must be admitted to candidacy before enrolling in Dissertation Courses

DISS901	Dissertation	3.0 credit hours
DISS905	Continuing Dissertation Services II	1.5 credit hours

The following courses are not scheduled with any other course:

DBA760	Strategic Decision Making for Managers (This course is taken as the final core course)
DISS901	Dissertation

PAGE 112, PROGRAM DESCRIPTIONS, PH.D. PSYCHOLOGY

Insert the following before “MASTER OF ARTS DEGREE”:

PSYCHOLOGY**Doctor of Philosophy Degree****Program Description**

The Doctor of Philosophy in Psychology degree is a research based program focused on career advancement in teaching, consulting, administration, or institutional research. The program prepares innovative scholars, researchers, and educators to contribute to the body of knowledge through intensive study in the field of psychology. The program, culminating in a dissertation, builds the foundation for theoretically grounded research and development of knowledge in the study and application of personality, motivation, learning, emotion, and behavior.

Program Objectives

Keiser University's Doctor of Philosophy in Psychology program enables students to contribute to the profession through independent learning, scholarship, and research. Upon completion of this program, students are able to:

- Develop an advanced understanding of general psychological principals and theories to include personality, motivation, learning, emotion, and behavior.
- Appreciate diversity in individuals and the global community, demonstrated through application of ethical problems solving at the individual, social, and organizational levels in the field of psychology.
- Evaluate educational and social services program designs to include program evaluation, curriculum development, and assessment strategies.
- Apply principles of effective research methods, evaluating problems, developing research strategies, designing and conducting psychological research, interpreting and evaluating research data, and formulating grounded conclusions to add to the body of knowledge.

Prerequisites for Major Courses

- Master degree from an accredited institution.

NOTE: Courses in the PhD program are eight-weeks in length and students are scheduled for one or two courses concurrently. Dissertation courses are eight-weeks in length and students are scheduled for two dissertation courses per semester.

Program Outline

To receive a Doctor of Philosophy in Psychology degree, students must earn 60 graduate semester credit hours. Fifty-four of the program hours must be completed through Keiser University. Program requirements are as follows:

Doctor of Philosophy in Psychology Major Core Courses (60.0 credit hours)

Foundation Courses (21.0credit hours)

PSY701	Research, Ethics, and Scholarly Writing	3.0 credit hours
PSY710	Cognitive & Affective Basis of Behavior	3.0 credit hours
PSY720	Ethics, Law, and Psychology	3.0 credit hours
PSY730	Human Development	3.0 credit hours
PSY750	Theories of Learning and Motivation	3.0 credit hours
PSY760	Sociocultural Basis of Behavior	3.0 credit hours
PSY770	Cross-Cultural Methods of Tests and Measurements	3.0 credit hours

Psychology Teaching Core Courses (12.0credit hours)

PSY780	Educational Psychology	3.0 credit hours
EDU740	Curriculum Design	3.0 credit hours
EDL751	Leadership: Assessment and Program Evaluation	3.0 credit hours
EPY816	Advanced Seminar in Teaching Psychology (Prerequisites: PSY750, PSY770, PSY780, EDU740, and EDL751)	3.0 credit hours

Psychology Research Core Courses (12.0credit hours)

RSM813	Advanced Experimental Design in Psychology	3.0 credit hours
RSM814	Policy Analysis	3.0 credit hours
RSM815	Psychometrics	3.0 credit hours
RSM816	Program Evaluation (project focused) (Prerequisites: RSM 700, RSM800, RSM 810, RSM812, RSM813, RSM814,	3.0 credit hours

and RSM815)

Research Courses (15.0credit hours)

RSM700	Quantitative Research I	3.0 credit hours
RSM800	Quantitative Research II (Prerequisite RSM700)	3.0 credit hours
RSM810	Qualitative Research	3.0 credit hours
RSM812	Research Theory, Design, and Methods (Prerequisites: RSM700, RSM800, and RSM810)	3.0 credit hours
RSM820	Advanced Research: Pre-Proposal and Literature Review (Prerequisite RSM700, RSM800, RSM810 and RSM812)	3.0 credit hours

RSM820 is scheduled as the last course and is not scheduled with any other course.

Dissertation Courses (12.0 credit hours)

Students must be admitted to candidacy before enrolling in Dissertation Courses.

Students must complete eight DSS900 courses.

DSS900	Dissertation	1.5 credit hours
--------	--------------	------------------

and is not scheduled with any other course.

INSTRUCTIONAL DESIGN AND TECHNOLOGY

Education Specialist Degree

Program Description

Keiser University's Education Specialist degree in Instructional Design and Technology prepares reflective scholars and capable professionals who apply instructional systems design, theory, tools, and technologies to achieve desired educational and training outcomes in various settings. The program fosters lifelong learning and values leadership, ethical and informed decision-making, diversity, assessment, program evaluation, effective communication, and technology.

Program Objectives

Keiser University's Education Specialist degree in Instructional Design and Technology program enables students to contribute to the education and training profession through independent learning, scholarship, and research. Upon completion of this program, students are able to:

- Create a shared vision of a learning culture by understanding and responding to the political, social, economic, legal and cultural environment.
- Respond to diverse communities of interest to create a safe, efficient, and effective learning environment.
- Continue to renew and develop expertise in the field of instructional design technologies demonstrated by effective written, spoken, and digital communication.
- Evaluate and apply current practices in course, program, and training development using effective instructional design and models supporting technology-based learning in various instructional situations.
- Evaluate and assess a range of technology-based learning models and integrate the use of effective technologies in supporting learner success.
- Explore and extrapolate implications in the advancement of future technologies in education and training on a global basis.
- Apply the skills and knowledge required in the use of multimedia applications in the development of training and learning activities.

Prerequisites for Major Courses

- Master degree from an accredited institution.

NOTE: Courses in the Education Specialist program are eight-weeks in length and students are scheduled for one or two courses concurrently.

Program Outline

To receive an Education Specialist degree, students must earn 30 graduate semester hours. Twenty-four of the program hours must be completed through Keiser University. Students must pass a Comprehensive Examination at the completion of coursework. Program requirements are as follows:

PAGE114, MASTER DEGREE PROGRAM DESCRIPTIONS—MASTER OF ACCOUNTANCY

Insert the following before MASTER OF BUSINESS ADMINISTRATION DEGREES:

MASTER OF ACCOUNTANCY

GENERAL ACCOUNTING CONCENTRATION

FORENSIC ACCOUNTING CONCENTRATION

Program Description

Keiser University's Master of Accountancy degree was developed with professional certification in mind, focusing on the theories and practices of accounting. The program prepares accounting professionals to demonstrate an understanding of accounting responsibilities, ethical standards related to business and the accounting profession, and the role accounting plays in business organizations and society. The intensive graduate program fosters independent

learning and enables students to contribute intellectually to the accounting profession. Students specialize in one of two areas: General Accounting or Forensic Accounting.

Program Objectives

KeiserUniversity's Master of Accountancy enables students to contribute to the accounting profession through independent learning, scholarship, and research. Upon completion of this program, students are able to:

- Apply accounting theory, practice, and professional ethical behavior to make informed decisions in their profession
- Evaluate and apply generally accepted accounting principles and practices using emerging technologies
- Create a shared vision of an accounting culture by understanding and responding to the needs of business and society in a global environment.
- Effectively apply accounting expertise to the disclosure of accounting information needed by internal and external decision-makers
- Continue to renew and develop expertise in the field of accounting up to and including professional certification

Program Prerequisites

- Baccalaureate degree from an accredited institution in accounting, business or a related discipline.
- ACG 5075 is required if a student does not have an undergraduate degree in accounting.

Program Outline

Students are required to select one of two major concentrations. **NOTE:** Courses in the Master of Accountancy program are each eight-weeks in length, and students are normally scheduled for two courses concurrently.

To receive a Master of Accountancy degree, students must earn 36 graduate level credit hours. Thirty of the program hours must be completed through KeiserUniversity. Program requirements are as follows:

Master of Accountancy Major Core Courses (24.0 credit hours)

ACG5135	Advanced Accounting Theory	3.0 credit hours
ACG5255	Advanced International Accounting Concepts	3.0 credit hours
ACG5835	Ethical Issues in Accounting	3.0 credit hours

PAGE 119, MASTER OF SCIENCE DEGREE PROGRAM DESCRIPTION—MASTER OF SCIENCE IN INFORMATION SECURITY

Insert the following BEFORE the entry for MS Nursing:

INFORMATION SECURITY

Master of Science Degree

Program Description

Keiser University's Master of Science in Information Security offers an intensive graduate program that provides information technology professionals with theoretical and practical knowledge in security concepts such as access control, secure application development, business continuity planning, cryptography, e-commerce regulations, operational, physical, architectural security, telecommunications and network security. This curriculum will prepare students for careers as a Chief Information Officer, Chief Security Officer, and network forensic specialist. Upon completion of the program graduate students should be able to take the widely recognized Certified Information Systems Security Professional (CISSP) exam. Additionally, this program will meet the requirements of the National Security Agency (NSA) Committee on National Security Systems (CNSS) curriculum mandated by the Department of Defense for government employees involved in information security.

Program Objectives

Keiser University's Master of Science in Information Security program enables students to contribute to the Information Technology profession through independent learning, scholarship, and research. At the conclusion of the program, master's students will be able to:

- Manage the use of information security methodologies in the practice of information assurance.
- Evaluate comprehensive and relevant information security system hardware and software.
- Assess the security needs of an enterprise information system and its applications to maintain the confidentiality, integrity and availability of digital data.
- Plan the use of network security using current cryptographic and access control technologies.
- Create information security policies and disaster recovery procedures that conform to moral, legal and ethical standards.

Program Outline

To receive a Master of Science in Information Security degree, students must earn 36.0 graduate semester credit hours. Transfer of graduate credits will be evaluated on a case by case basis. Thirty program hours must be completed through Keiser University. Program requirements are as follows:

Master of Science in Information Security Courses (36.0 credit hours)

Required Major Core Courses (30.0 credit hours)

ISS500	Operating Systems and Application Support	3.0 credit hours
ISS510	Enterprise Information Systems and Networks	3.0 credit hours
ISS520	Database Systems and Security	3.0 credit hours
ISS550	Software Engineering	3.0 credit hours
ISS630	Secure Client-Server Computing	3.0 credit hours

ISS660	Wireless Infrastructure and Security	3.0 credit hours
ISS670	Advanced Network Security	3.0 credit hours
ISS680	Intrusion Detection and Prevention Systems	3.0 credit hours
ISS690	Capstone Project Information Security	3.0 credit hours

Electives (6.0 credit hours)

ISS655	Global E-Commerce and Privacy Assurance	3.0 credit hours
ISS675	Survey of Computer Languages	3.0 credit hours
ISS685	E-Discovery, Network and Computer Forensics	3.0 credit hours
ISS695	Risk Analysis and Vulnerability Assessment	3.0 credit hours

PAGE 119, MASTER OF SCIENCE DEGREE PROGRAM DESCRIPTION—MASTER OF SCIENCE IN MANAGEMENT

Insert the following after the entry for MS Information Security and before the entry for MS Nursing:

MANAGEMENT

Master of Science Degree

Program Description

Keiser University's Master of Science in Management (MSMan) program is a 33 semester credit program that prepares students to compete in the current leadership and management environment. It is designed for students who want to develop the leadership skills to manage and lead employees in organizations and for professionals who want to assume greater management responsibilities within their organizations. The program emphasizes leadership skills, strategic planning and implementation, the human resources aspect of management, managerial communication and how to develop other leaders within the organization.

Program Objectives

Keiser University's Master of Science in Management (MS Man) program enables students to contribute to the management profession and fosters independent learning. Upon completion of this program, students are able to:

- Demonstrate the ability to manage projects, strategic planning, management and implementation required by the organization
- Demonstrate proficiency in managing and enhancing people skills in organizations
- Demonstrate the ability to align organizational resources to lead effectively
- Demonstrate an ability to effectively make and implement decisions
- Demonstrate assessment skills by leading, evaluating and promoting personnel
- Demonstrate professionalism as a manager within the organization through communication and leadership skills

Program Outline

Students take 11 major courses for 33 graduate credit hours. **NOTE:** Courses in the MS Man program are each eight-weeks in length, and students are normally scheduled for two courses concurrently.

To receive a Master of Science in Management degree, students must earn 33 graduate level credit hours. Twenty-seven of the program hours must be completed through Keiser University. Program requirements are as follows:

Master of Science in Management Major Core Courses (33.0 credit hours)

MAN562	Business Information Systems	3.0 credit hours
MAN571	Organizational Behavior	3.0 credit hours

	(co-requisite course)	
MAN573	Project Management	3.0 credit hours

PAGE 124, GRADUATE BUSINESS CERTIFICATE PROGRAM DESCRIPTIONS

Insert the following above Bachelor of Arts Degrees:

GRADUATE BUSINESS CERTIFICATE PROGRAMS

HEALTH SERVICES MANAGEMENT

MANAGEMENT AND LEADERSHIP

Program Description

Keiser University's Graduate Business Certificate Programs educate students in the theories and practices of the business world. The certificate programs are geared toward students who want to learn the foundational skills in a particular field or those who want to build upon their existing senior-level experience to advance their career in one of the subject areas. The courses in each of the areas can be applied toward an MBA degree for candidates who meet admissions criteria. Certificate students specialize in one of the following areas: Health Services Management or Management and Leadership.

Prerequisites for Core Courses

- A baccalaureate degree from an accredited institution
- Professional resume
- Interview with MBA concentration chair
- A one page personal statement describing the applicant's expectations of the certificate program

NOTE: Courses in the Graduate Business Certificate program are eight-weeks in length and students are scheduled for one or two courses concurrently.

Program Outline

To receive a Graduate Business Certificate, students must earn 18 graduate semester hours in an approved certificate program area. All 18 credit hours must be completed through Keiser University. Certificate program requirements are as follows:

Health Services Management Graduate Certificate (18.0 credit Hours)

MAN 571 Organizational Behavior (co-requisite)	3.0 credit hours
MKT 531 Marketing Management	3.0 credit hours
MAN 672 Human Resources Management	3.0 credit hours
HSM 691 Quality Management in Health Care	3.0 credit hours
HSM 692 Strategic Management of Health Services Organizations	3.0 credit hours
HSM 693 Corporate Compliance in Health Care	3.0 credit hours

Management Leadership Graduate Certificate (18 Credit Hours)

MAN 571 Organizational Behavior(co-requisite)	3.0 credit hours
MAN 551 International Business	3.0 credit hours
MAN574 Managerial Communication	3.0 credit hours
MAN 671 Leadership Development	3.0 credit hours

Replace this section with the following:

ACCOUNTING

Bachelor of Arts Degree

Program Description

Keiser University's Bachelor of Arts degree in Accounting focuses on accounting, business and communications skills needed in today's business environment. The program provides the unique skills needed in various areas of accounting such as: taxation, auditing, managerial/cost, financial, governmental, and accounting information systems as well as general business courses. The Bachelor of Arts degree in Accounting also uses various business and accounting related software programs to enhance students' knowledge.

Program Objectives

The following objectives are designed to meet Keiser University's mission and its goals:

- To enhance student's knowledge of various specialty areas within accounting and general business
- To prepare students for jobs in the accounting field
- To develop student's proficiency in the use of business and accounting software applications
- To help students develop strong communication and business research writing skills
- To reinforce ethical and legal business practices through the use of critical thinking skills

Prerequisites for Upper Division Courses

• ECO1023*	Microeconomics	3.0 credit hours
• ECO2013*	Macroeconomics	3.0 credit hours
• STA2023*	Statistics	3.0 credit hours

*Courses must be completed with a grade of "C" or higher

PAGE 143, BA PSYCHOLOGY PROGRAM DESCRIPTION

Insert the following before “Bachelor of Science Degrees”:

PSYCHOLOGY

Bachelor of Art Degree

Program Description

The Bachelor of Arts degree in Psychology offers a diverse curriculum that provides a broad-based education in many facets of behavior, mental processes, communication, research, and writing. Courses include forensics, sports and positive psychology, as well as the traditional courses needed to prepare students for graduate studies. Student learning objectives include the application of scientific method, neuroscience relations to behavior, and the ethical treatment of human and animal research subjects.

Program Objectives

Upon completion of this program, students are able to:

- Apply the scientific method to psychological research
- Explain principles of neuroscience as they relate to behavior
- Identify what constitutes ethical treatment of human and animal subjects in research
- Develop an understanding of APA format and writing in the field of psychology
- Develop an understanding of how statistical tests are commonly used in psychological research.
- Analyze human behavior and mental processes
- Explain theories of development throughout the lifespan
- Evaluate theories of personality
- Understand applied psychological approaches for health, marriage and family, sports, and industrial psychology.
- Explain basic concepts of clinical and counseling psychology
- Explain processes of learning and cognition

Prerequisites for Major Courses

- PSY1012 Introduction to Psychology
- STA2023 Statistics

Program Outline

To receive a Bachelor of Arts Degree in Psychology, students must earn a total of 120.0 credit hours. Program requirements are as follows:

PAGE 145, BS DIETETICS AND NUTRITION PROGRAM DESCRIPTION

Replace the admission requirements with the following:

Admission Requirements for the Dietetics Alternative Track Program

In order to be evaluated for admission into the Alternative Track Program within the Dietetics and Nutrition Department, candidates must submit documentation of the following:

- Completion of a Bachelor of Science in Dietetics, Nutrition and/or related Food Science program from a regionally accredited University.
- Minimum cumulative grade average of 3.0 on a scale of 4.0.
- An original copy of a Verification Statement issued by a CADE approved DPD or CP program.
- Two letters of reference
- One page Letter of application (including but not limited to work and volunteer experience, projected focus in the field of Dietetics and applicant's desire to become a practicing Registered Dietitian).

Graduation requirements to successfully complete the Alternative Track Program

- A grade average of 3.0 on a scale of 4.0 in graded courses (and a passing grade in all pass/fail courses*):
 - DIE 4365 Dietetics Management of Nutrition Programs
 - DIE 4246C Clinical Nutrition
 - DIE 4506 Seminar in Dietetics and Nutrition*
 - DIE 3175 Dietetics Management Practicum*
 - DIE 3355 Dietetics in Community Health Practicum*
 - DIE 4277 Clinical Nutrition Practicum*
 - DIE 4536 Advanced Practicum in Dietetics*

PAGE 152, BS FORENSIC INVESTIGATIONS PROGRAM DESCRIPTION

Replace this section with the following:

Program Objectives

The following objectives are designed to meet Keiser University's mission and its goals:

- To provide students with a comprehensive background in forensic investigative procedures and techniques.
- To instruct students in basic scientific concepts attributable to the natural and physical sciences.
- To provide students with a comprehensive background in the current use of natural and physical sciences in the solution of crime
- To provide students with a comprehensive background in criminal statutes, rules of criminal procedure, and rules of evidence which affect their capacity to testify effectively as expert witnesses in legal proceedings.

- To assist graduates in obtaining entry-level positions where their forensic investigation skills can be employed.

Prerequisites for Upper Division Major Courses

All lower division courses must be completed with a minimum grade average of 2.5 on a 4.0 scale.

Graduation Requirements (in addition to Degree Requirements section of the catalog)

Successful completion of all upper division courses with a minimum grade average of 2.5 on a 4.0 scale.

PAGE 179, BS SPORTS MANAGEMENT PROGRAM DESCRIPTION

Insert the following new program information before the Sports Medicine and Fitness Technology section:

SPORTS MANAGEMENT

Bachelor of Science Degree

GOLF CONCENTRATION

Program Description

Keiser University's Bachelor of Science Degree in Sports Management with a concentration in Golf is a degree completion program for graduates of associate degree programs in hospitality, fitness, sports, recreation, golf, or a related field. The curriculum supports an expanded professional role of sports managers with an emphasis on the golf industry. The program focuses on the managerial and business aspects of a career in a sports related business with a concentration in the golf industry.

Program Objectives

Upon completion of this program, students are able to:

- Integrate knowledge from sports management, golf management and business administration.
- Apply business procedures to sports management with a focus on the golf industry.
- Demonstrate the proper use of technology in golf instruction – including video analysis and online lesson procedures.
- Effectively market various types of golf facilities and golfer development programs.
- Understand the principles of organizational behavior as it relates to sports management and golf industry staffing.
- Understand the legal ramifications of managing a golf facility as it relates to both business law and human resource management.

Prerequisites for Major Courses

- Graduation from an accredited associate degree program in golf, physical education, fitness, sports, recreation or a related field
- Documentation of a minimum of six months post-graduate work experience in a related field
- The following lower level division courses must be successfully completed. (Course equivalency is established by the Dean of Academic Affairs from official transcripts received from accredited institutions.)
ENC2102 English Composition II (prerequisite ENC1101)
MAC2105 College Algebra or MGF2106 College Math, or STA2023 Statistics
- A minimum of 24 semester credit hours of general education courses must be earned by students transferring credits from another associate degree program.

Program Outline

To receive a Bachelor of Science Degree in Sports Management with a concentration in Golf students must earn 60.0 upper division credit hours. Program requirements are as follows:

Upper Division Sports Management Courses (15.0 credit hours)

SPM3158	Strategies in Sport Management	3.0 credit hours
SPM4025	Diversity in Sport	3.0 credit hours

SPM4104	Facilities and Event Management	3.0 credit hours
SPM4204	Ethical Issues in Sports	3.0 credit hours
SPM4505	Sport Finance	3.0 credit hours

Upper Division Business Management Courses (15.0 credit hours)

MAN3025	Introduction to Mgmt/Organizational Behavior	3.0 credit hours
ACG3024	Accounting for Non-financial Managers	3.0 credit hours
MAN 3504	Operations Management	3.0 credit hours
MAN4164	Leadership	3.0 credit hours
MAN4583	Project Management	3.0 credit hours

Upper Division Golf Concentration Courses (18.0 credit hours)

SPM3110	Golfer Development Programs	3.0 credit hours
SPM3115	Principles and Science of Coaching	3.0 credit hours
SPM3310	Marketing in Golf	3.0 credit hours
SPM4118	Technology in Sports Coaching	3.0 credit hours
SPM4128	Human Resources Mgmt. for the Golf Professional	3.0 credit hours
SPM415	Sport Administration and Law for the Golf Professional	3.0 credit hours

Upper Division General Education Courses (12.0 credit hours)

IDS3355	Critical Thinking	3.0 credit hours
INP3224	Workforce Diversity	3.0 credit hours
COM3131	Interpersonal Communication	3.0 credit hours
ECN3213	Professional Writing	3.0 credit hours

PAGE 226, AS HISTOTECHNOLOGY PROGRAM DESCRIPTION

Replace this section with the following:

Prerequisites for Major Courses

- Minimum cumulative grade average of 2.0 for general education courses

PAGE 246, AS RADIATION THERAPY PROGRAM DESCRIPTION

Replace this section with the following:

RADIATION THERAPY

Associate of Science Degree

An Associate of Science degree is considered a terminal degree. The decision on course transferability rests with the receiving institution.

Program Description

KeiserUniversity's Associate of Science degree in Radiation Therapy is dedicated to preparing its students to become professional radiation therapists. Students will learn to utilize radiation and radioactive isotopes in the treatment of disease, primarily cancer. Radiation therapists are highly skilled members of the cancer management team and responsible for accurately recording, interpreting and administering the treatment prescribed by radiation oncologists. Students will learn how to localize tumors, implement treatment plans and evaluate the clinical progress of patients. Students will also be trained to demonstrate a high quality of technical expertise, provide competent compassionate clinical care, and collaborate effectively with their colleagues.

Program Mission Statement

The mission of KeiserUniversity's Radiation Therapy program is to provide an academic and clinical environment to educate and graduate competent, entry-level radiation therapists who provide quality patient care in the

community. The program will also encourage professional growth and research to advance and promote radiation therapy practice.

Program Goals

The following goals are designed to meet KeiserUniversity's mission and goals and to further define the programmatic goals for Radiation Therapy:

- Provide professional, qualified entry-level radiation therapists to serve in the community
- Provide through educational instruction and clinical experiences a program that develops professional skills necessary to function as radiation therapists
- Provide instruction in diversity, quality patient care, writing, critical thinking and problem solving skills, as well as ethical standards as set forth in the ARRT Code of Ethics
- Graduate students prepared for the national certification examination administered by the American Registry of Radiologic Technologists

Program Objectives

The following objectives are designed to meet the program's mission and goals for Radiation Therapy:

- Acquire the skills and knowledge to function effectively in their role as members of the radiation therapy team in delivering a planned course of treatment utilizing high energy photon or electron beams of radiation
- Competently demonstrate the use and application of ionizing radiation therapy units and devices
- Apply critical thinking and problem solving skills to achieve program goals and clinical objectives
- Exhibit professional and personal growth coupled with lifelong learning skills, communicating effectively with faculty, patients, families and members of the healthcare team
- Demonstrate fabrication and block cutting skills and the use of patient immobilization and treatment enhancing devices appropriately

Prerequisites for Major Courses

- Background check and drug screening when applicable
- Completion of all general education coursework with a minimum grade of "C" for each course
- Cumulative grade average of 3.0 on a scale of 4.0

Program Outline

To receive an Associate of Science degree in Radiation Therapy, students must earn a total of 93.0 credit hours. Each major course is a prerequisite for the subsequent course and therefore must be completed with a grade of "C" and a minimum cumulative grade point average of 2.75 or higher in order to proceed successfully through the program. Program requirements are as follows:

Radiation Therapy Major Courses (67.0 credit hours)

RAT1001	Introduction to Radiation Therapy	5.0 credit hours
RAT1123	Patient Care in Radiation Therapist	5.0 credit hours
RAT2021	Principles and Practice of Radiation Therapy I	5.0 credit hours
RAT2617	Radiation Therapy Physics I	5.0 credit hours
RAT1804	Radiation Therapy Clinical Education I	3.0 credit hours
RAT1814	Radiation Therapy Clinical Education II	3.0 credit hours
RAT2241	Radiobiology and Pathology	5.5 credit hours
RAT2618	Radiation Therapy Physics II	5.5 credit hours
RAT2022	Principles and Practice of Radiation Therapy II	5.5 credit hours
RAT2657	Quality Management	4.25 credit hours
RAT2804	Radiation Therapy Clinical Education III	3.0 credit hours
RAT2814	Radiation Therapy Clinical Education IV	3.0 credit hours
RAT2652	Treatment Planning and Dosimetry	4.25 credit hours
RAT2824	Radiation Therapy Clinical Education V	3.0 credit hours

RAT2834	Radiation Therapy Clinical Education VI	3.0 credit hours
RAT2061	Radiation Therapy Seminar	4.0 credit hours

General Education Courses (26.0 credit hours)

Credit hours in parentheses indicate the required number of credit hours in each discipline.

Behavioral/Social Science (3.0 credit hours)

PSY1012	Introduction to Psychology	3.0 credit hours
---------	----------------------------	------------------

Computers (3.0 credit hours)

CGS1000C	Introduction to Computers	3.0 credit hours

BSC2085C	Anatomy and Physiology I	4.0 credit hours
BSC2086C	Anatomy and Physiology II	4.0 credit hours

PAGE 251, AS RESPIRATORY THERAPY PROGRAM DESCRIPTION

Replace this section with the following:

Respiratory Therapy

Associate of Science Degree

An Associate of Science degree is considered a terminal degree. The decision on course transferability rests with the receiving institution.

Program Description

Keiser University's Associate of Science degree in Respiratory Therapy prepares students for employment as respiratory therapists under the supervision of licensed physicians. A Respiratory Therapist provides education, diagnostic testing and respiratory therapy in the management of conditions such as chronic obstructive pulmonary disease, acute cardio-respiratory failure, asthma, and other pulmonary pathologies. Graduates are eligible to take both the national certification examination and the national registry examination given by the National Board for Respiratory Care (NBRC) and are eligible to be licensed by the State of Florida. Responsibilities of a respiratory therapist include:

- Identifying lung and breathing disorders and recommending treatment methods.
- Interviewing patients and doing chest physical exams to determine what kind of therapy is best for their condition.
- Consulting with physicians to recommend a change in therapy, based on patient evaluation.
- Analyzing breath, tissue, and blood specimens to determine levels of oxygen and other gases.

- Managing ventilators and artificial airway devices for patients who can't breathe normally on their own.
- Responding to Code Blue or other urgent calls for care.
- Educating patients and families about lung disease so they can maximize their recovery.

Program Mission Statement

The Respiratory Therapy program at Keiser University offers an associate of science degree that is designed to prepare students to become effective, knowledgeable, safe and competent respiratory therapy practitioners who will practice under the supervision and direction of a licensed physician.

Program Goal

To prepare graduates with demonstrated competence in cognitive (knowledge), psychomotor (skills), and affective (behavior) learning domains of respiratory care practice as performed by registered respiratory therapists (RRT's).

Program Objectives

The following objectives are designed to meet Keiser University's Respiratory Therapy Program's mission and goals:

- To provide an environment in which students demonstrate ethical behaviors, critical thinking skills and a commitment to lifelong learning
- Development of clinical skills, treatment techniques, understanding of methodology, and rationale for implementation and interpretation of diagnostics and cardio-respiratory care
- To provide the students with an academic foundation to adequately fulfill the role of a respiratory care practitioner in a clinical setting

Prerequisites for Major Courses

- Background check and drug screening
- Completion of general education courses with a minimum grade of "C" in each course
- Minimum cumulative grade point average of 3.0 on a 4.0 scale.
- Minimum grade of "B" in Human Anatomy and Physiology I and II

Program Outline

To receive an Associate of Science degree in Respiratory Therapy, students must earn 88.0 credit hours. Each course in the Respiratory Therapy major is a prerequisite for the subsequent course and must be completed with a grade of "C" or higher in order to progress to the next course in the sequence. Students must complete all courses in the program core. Requirements are as follows:

Respiratory Therapy Major Courses (51.0 credit hours)

RET1024C	Respiratory Therapy Fundamentals	4.0 credit hours
RET1485C	Respiratory Therapy Theory	4.0 credit hours
RET1291C	Clinical Respiratory Medicine	4.0 credit hours
RET1007C	Pharmacology for Respiratory Care	4.0 credit hours
RET1940	Clinical Practicum I	3.0 credit hours
RET1405C	Diagnostic Procedures in Respiratory Care	4.0 credit hours
RET2283C	Intensive Respiratory Care	4.0 credit hours
RET2941	Clinical Practicum II	3.0 credit hours
RET2710C	Pediatric and Neonatal Respiratory Care	4.0 credit hours
RET2944	Clinical Practicum III	3.0 credit hours
RET2934C	Special Topics in Respiratory Care	4.0 credit hours
RET2946	Clinical Practicum IV	3.0 credit hours
RET2948	Clinical Practicum V	3.0 credit hours
RET2935C	Respiratory Therapy Management	4.0 credit hours

General Education Courses (37.0 credit hours)

Credit hours in parentheses indicate the required number of credit hours in each discipline.

PAGE 270, PH.D. ED LEADERSHIP COURSE DESCRIPTIONS

IDT720 (3.0 credit hours)

Designing Training and Performance Solutions

Educational managers are more effective if they possess a repertoire of training and performance tools with which to manage teachers, staff, and students. This course is designed to give educational leaders the theoretical and practical skills to design training and performance solutions, integrating instructional design techniques common in education today. Course topics include learning theories, instructional and performance design models, assessment and evaluation techniques, and training technology. Students design and implement an intervention by conducting a needs assessment, diagnosing the results, developing a solution for the performance gap, and continuously evaluating and assessing the intervention.

IDT721 (3.0 credit hours)

Leading Innovation Technology

This course is designed to provide educators the leadership and management decision-making skills for applications and advancements of technology in education. Learning theory forms the basis for using technology in the classroom and will be applied to assessing technological resources and innovation. Course topics include: instructional delivery using multimedia, matching technologies to outcomes, cost and funding of technology, and trends in instructional technology. Risks and threats with the wide availability of media (the internet, iPods, cell phones, and others) to classroom security and ethical student behavior are assessed and evaluated.

IDT722 (3.0 credit hours)

Management of Distance Education

This course gives educational leaders the skills and competencies to administer, manage, and lead distance education programs. Topics include managing existing programs, design and implementation of distance education programs, marketing distance education programs, and improving existing programs for efficient and effective delivery. From a research perspective students appraise the role of the course room facilitator, evaluating course room instruction, and assessing course room security and achievement of learning outcomes. Issues and policies related to distance education ethics, security, and acceptance are addressed.

PAGE 274, PH.D. ED LEADERSHIP DISSERTATION COURSES

Delete EDR901A through EDR904B and replace with the following:

EDR900 (1.5 credit hours)

Dissertation

The dissertation is designed to guide candidates through the theoretical, research-related, and practical aspects of designing and implementing research, adding to the body of knowledge in the field. Candidates will write and defend a proposal, conduct research, submit a dissertation to their committee for approval, and defend the dissertation. Candidates must complete eight dissertation courses. Prerequisite: Doctoral candidacy

Repeat for dissertation courses beginning on page 278.

PAGE 282, DOCTOR OF BUSINESS ADMINISTRATION COURSE DESCRIPTIONS

Doctor of Business Administration Degree

Major Course Requirements

Core Courses Descriptions

DBA 700 (3.0 credit hours)

Foundations in Business Research Writing

The course focuses on business research writing and enables students to gather and assess information and ideas in the exercise of academic inquiry. The course provides a solid foundation necessary for academic writing, from identifying a problem to submitting a paper for publication. Topics include: problem identification, formulating a hypothesis, finding and using authoritative sources, paraphrasing and summarizing information, writing literature reviews, identifying a methodology, evaluating and interpreting results, crediting sources, and writing, revising, and formatting the research paper. (Program co-requisite)

DBA 710 (3.0 credit hours)

Management and Leadership Approaches

Doctoral students will increase their learning on the history and evolution of management thought to evaluate the effectiveness of management functions in the modern organization. Doctoral Students will perform an in-depth exploration of the different management approaches in domestic and global organizations as well as management's impact on organizational design, organizational behavior, leadership, international business, ethics, social responsibility, and the legal landscape. (Co-requisite: DBA700)

DBA 720 (3.0 credit hours)

Global Business

The course examines the theory and practice of international and global business focuses on the organizational structures, strategies and operations of Multinational Enterprises (MNEs). Global political, economic, and social environment within which MNE operates, together with issues, such as cross-culture, labor and environmental standards are linked to the topics. This course provides a solid framework for all doctoral students and for the doctoral specialization in Global Management. (Co-requisite: DBA700)

DBA 730 (3.0 credit hours)

The Global Economy

The course examines how to better understand the economic environment by studying periods of prosperity and crises in domestic and global settings. The primary focus will be on the events leading up to economic crises and recoveries and the analysis and synthesis of data used to forecast those movements. Topics will include financial system crises, natural disasters, wars, inflation (or deflation), risk and volatility measures, and econometric models. Doctoral students will utilize event studies, classroom discussions, and brief assignments that will allow them to better understand both short-term and long-term consequences of domestic and global economic events. There will be a heavy emphasis on the adaptation of organizational strategies to reflect current economic realities and possible outcomes.(Co-requisite: DBA700)

DBA 740 (3.0 credit hours)

Financial Theory and Policy

Doctoral students will learn the seminal theories which form the foundation of finance. These theories include, but are not limited to, the capital asset pricing model, arbitrage pricing theory, option pricing theory, and the Modigliani-Miller theorems. Additional topics such as the term structure of interest rates, capital budgeting, the Efficient Market Hypothesis, capital structure, dividend policy and international business will also be studied. (Co-requisite: DBA700)

DBA 750 (3.0 credit hours)

Marketing Management

The course covers the full range of principles, theories, and practice of management of the marketing function. Students will learn the theories of the field including both key seminal literature and current published research. Students will explore problem-solving techniques for practical application through cases and modeling techniques, and will study current developments in marketing from both academic and practitioner perspectives. (Co-requisite: DBA700)

MBA 760 (3.0 credit hours)

Strategic Decision Making for Managers

The course will explore and examine the effective leadership approaches in organizations that have contributed to the organization's success. Since good decisions are driven by data and statistical evidence, business executives and professionals will acquire the ability to adjust decisions on scientific analysis of data. The course will enable business executives and professionals to intelligently collect, analyze, interpret, and present data relevant to decision-making. These conclusions from the analysis will lead managers to design, develop, implement, and effectively disseminate policies through information systems & technology.(Pre-requisite: DBA700, DBA710, DBA720, DBA730, DBA740, DBA750, DBR800, DBR810, DBR811)

Research Course Descriptions

DBR800 (3.0 credit hours)

Methods and Analysis of Quantitative Research

The course focuses on descriptive and inferential statistical methods across the disciplines. Students will identify and interpret variables, data entry procedures, analysis and presentation of data. The material presented will include identification of categories of abstract representation of data, descriptions of data entry procedures, analysis, and presentations. Students will critique descriptive research studies. Computer applications, logistical issues of data

collection, and ethical considerations are examined. Upon completion of this course, students will produce a final project that includes SPSS procedure selection and execution, application, analysis, and interpretation of a data set. It is recommended that students have a minimum working knowledge of basic Excel or SPSS functions prior to taking this course. (Pre-requisite: DBA700)

DBR810(3.0 credit hours)

Methods and Analysis of Qualitative Research

The course is designed to give researchers the assumptions, theories, and processes of qualitative inquiry. Course topics include the purpose and methods of various qualitative traditions as well as interviewing techniques, field observations, content analysis, focus groups, and questionnaire design. Decision making and research methodologies for expanding the body of knowledge are developed and implemented. (Pre-requisite: DBA700)

DBR811(3.0 credit hours)

Mixed Methods

This course provides students with an understanding of mixed methods (qualitative and quantitative) approaches to research studies. Appropriate strategies for incorporating both quantitative and qualitative paradigms will be analyzed. Specific issues, challenges, and considerations encountered in using mixed methodologies will be addressed in detail. The conflict between positivism and constructivism will be investigated, as will various examples of mixed model designs applicable to business problems. While there are pragmatic advantages to combining qualitative and quantitative methods, it is important to know that there are philosophical debates about combining these distinct approaches. Students need to understand the paradigmatic backgrounds of each approach and how to deal with these paradigm differences to answer real-world research questions. (Pre-requisite: DBA700, DBR800, DBR810)

Marketing Specialization Course Descriptions

MKT 851(3.0 credit hours)

Emerging Issues in Marketing

The course is designed to help doctoral students develop both an appreciation for the intellectual growth of marketing as an academic discipline and a set of skills related to the practice of marketing management. Students will analyze the role of marketing in a modern organization and, through the use of case, lecture, and market modeling assignments, will develop skills in planning and executing marketing programs. Students will examine the intellectual underpinnings of marketing as a discipline by comparing and contrasting the development of marketing theories from both an historical as well as philosophical basis. In doing so, they will also be exposed to the basic issues involved with doing scientific research in the social sciences. Additional topics include: e-Commerce, social networking, technology, and new trends to be examined. (Pre-requisite: All core and research courses)

MKT 852 (3.0 credit hours)

Seminar in Global Marketing

The course is designed to develop an understanding of the problems and opportunities present in the international business environment and the challenges involved in the development and implementation of the international corporate/marketing strategy. It includes an analysis of the environment of international markets, theories and models, market research methodology, and the marketing mix. (Pre-requisite: All core and research courses)

MKT 853 (3.0 credit hours)

Seminar in Marketing Models and Theory

This course is designed to prepare doctoral students in marketing for the dissertation by providing them with the skills to develop theory within a marketing context. The students will examine a structured theory development procedure and will complete a theory development paper. In addition, students will read and critique works in the field. (Pre-requisite: All core and research courses)

MKT 854 (3.0 credit hours)

Consumer Behavior Theory and Practice

The course examines new customer theory, the applications of creating theoretical constructs incorporating marketing dominant logic, customer lifetime value models, and analytical methods to develop and design consumer response systems. Customer loyalty and satisfaction are measures to help assess impacts of various marketing strategies using techniques and scales to create improved consumer results. Developing promotional methods for practical customer application provides marketing professionals advanced tools to design enhanced service performance and tangible sales programs. Additional topics include: defining consumer responses to the target market and investigating market segmentation to improve overall goal performance. (Pre-requisite: All core and research courses)

MKT 855 (3.0 credit hours)

Strategic Service Marketing

Service marketing requires strategies and tactics that are different from traditional goods marketing. The doctoral student will explore service quality theories and measurements, customer expectations and perceptions, business-to-business service applications, a conceptual framework for service recovery, the financial and economic impact of service quality, service innovation and design processes, the customer's role in service delivery, and global services marketing. Students will be evaluated on the basis of several practical assignments using new theories of service quality and they will develop a service marketing plan. Students will be prepared for various career opportunities in services marketing. (Pre-requisite: All core and research courses)

MKT 856 (3.0 credit hours)

Seminar in Research Analysis for Marketing Decisions

The course is designed to help doctoral students master their understanding of the total process of generating and transforming data into information relevant to identification and analysis of issues in the field of marketing. Emphases are placed on research designs: exploratory, descriptive, and causal. Additional topics include: methodologies in measurement and scaling, sampling, inferential statistics, and techniques of data collection. (Pre-requisite: MKT851, MKT852, MKT853, MKT854, MKT855)

Global Organizational Leadership Program Description

LDR 811(3.0 credit hours)

In-Depth Exploration of Organizational Behavior

Doctoral students will analyze the importance of how management at all levels and employees view organizations. In depth studies on perception, effective communication, culture, motivation, groups, teams, leadership styles, and power will be researched thoroughly to contribute to their increased mastery of organizational behavior. (Pre-requisite: All core and research courses)

LDR 812(3.0 credit hours)

Analysis of Management History, Theory, and Leadership Thought I

Doctoral students will research the history of management, the emergence of important leaders, and their contributions to the field. Doctoral students will develop taxonomies of leadership qualities that match their own. The taxonomy will be used as a solid foundation for the leadership plan they will write in LDR 816 Analysis of Management History, Theory, and Leadership II. (Pre-requisite: All core and research courses)

LDR 813 (3.0 credit hours)

Leading in the 21st Century

Doctoral students will research leadership practices pre 21st Century and compare and contrast the application of leadership and management thought. Doctoral students compare, contrast, and innovate leadership practices not only for 21st Century organizations but to make them useful for organizational behavior factors such as generational

differences, national, multinational, and global organizations and the impact of technology and information systems. (Pre-requisite: All core and research courses)

LDR 814 (3.0 credit hours)

Transformational Leadership

Doctoral students will conduct in depth research on transformational leaders and change agents. Effective leadership will be analyzed. Topics include: guiding organizations through innovation, motivation, inspiration, excitement and creating atmospheres of enthusiasm to ensure success in a dynamic business environment. (Pre-requisite: All core and research courses)

LDR 815 (3.0 credit hours)

Emerging Leadership Practices

Doctoral students will explore the leadership practices that have emerged as a result of uncertain economic times, recessions, legal landscape and the global arena. Students will analyze and assess the importance of positioning organizations for success while coping with the economic, social, political, technological, legal, and cultural elements domestically and globally. (Pre-requisite: All core and research courses)

LDR 816 (3.0 credit hours)

Analysis of Management History, Theory, and Leadership Thought II

Doctoral students will write a leadership plan that will be all inclusive and comprehensive. The plan will incorporate leadership qualities that apply to their organization based on their initial research in LDR 812 Analysis of Management History, Theory, and Leadership II. Doctoral students will discuss, analyze and propose the mission, vision, and strategic direction of the organization, utilizing scholarship, business, administration, and education. (Pre-requisite: LDR811, LDR812, LDR813, LDR814, LDR815)

Global Business Specialization Course Descriptions

INB 821(3.0 credit hours)

Cross Cultural Management and Negotiations

The course explores understanding and managing cultural synergy and human dynamics in a multi-cultural business environment. It offers a selective but broad view of current thinking on culture linked to management, organization, communication and negotiation. The theory and practice of management and negotiation in a cross-cultural global business are examined through models of cross cultural management, which are critiqued and applied to contemporary business cases. (Pre-requisite: All core and research courses)

INB 822 (3.0 credit hours)

Global Financial Management

The course emphasizes the managerial perspective of global financial management. Topics include: commercial and investment banking, portfolio analysis and risk assessment, new market development, international business consulting and international business law. The decision-making process is presented with an emphasis on analyzing and selecting informed managerial decisions in an evolving global financial landscape. (Pre-requisite: All core and research courses)

INB 823 (3.0 credit hours)

Global Strategic Management

The course combines the principles of international business operations and information systems that enable global trade and operations. Building on the concepts from strategic management, operations management, marketing and human resource management, this course focuses on the management information systems models used in the international business environment and the decision making tool used to best support strategic direction.(Pre-requisite: All core and research courses)

INB 824 (3.0 credit hours)

Global Management Information Systems

The course prepares doctoral students to understand and meet the management challenges faced by firms competing internationally. Doctoral students appraise and critique how firms use international strategy to build and sustain competitive advantage in an international context. Topics include: logistical designs, cost volume profit analysis, decision analysis and design, knowledge based systems, project management, disaster recovery, and strategic planning. (Pre-requisite: All core and research courses)

INB 825 (3.0 credit hours)

Global Supply Chain Management

Global Supply Chain Management (GSCM) combines the essential business processes along with the knowledge and skills required to manage within a global business environment. The course focuses on the dynamics of sourcing including how products, services, and information are developed. Doctoral students will analyze the benefits and challenges of global sourcing and logistics, and understand how to design and manage a sustainable global supply chain system. Topics include: strategic supply-chain management practices, global sourcing, logistics and supply chain operation, sustainable logistics, and supply chain systems designs. (Pre-requisite: All core and research courses)

INB 826 (3.0 credit hours)

Advanced Topics in Global Management

Doctoral students will integrate principles and practices of international trade and investment, global finance, global human resource management, global supply chain management, global marketing management and risk management to achieve a global mindset. Course topics include: globalization and localization, doing business in developing countries, global strategy, multinationals' entry mode, and business disaster recovery. (Pre-requisite: INB821, INB822, INB823, INB824, INB825)

Dissertation Course Descriptions

DISS901 (3.0 credit hours)

Dissertation I: Pre-Proposal, Literature Review, Chapter I

The course is the first in the series of dissertation courses, designed to establish the framework for a successful dissertation process. Doctoral students complete the CITI training and petition for the dissertation committee; and demonstrate expertise in writing conceptually cogent Chapters 1 and 2. Researchers are provided with resources, guidance, and peer and mentor support as they write their proposal and dissertation. (Pre-requisite: Candidacy and two (2) specialization courses)

DISS902 (3.0 credit hours)

Dissertation II: Methodology, Proposal

The course is designed for the doctoral student to finalize and defend the proposal. Application for IRB approval will be made prior to conducting research approved by the committee and described in the proposal. Doctoral students will demonstrate expertise conducting conceptually cogent and methodologically rigorous research, analyzing findings, making recommendations, and generating appropriate conclusions. (Pre-requisite: DISS901, four (4) specialization courses)

DISS903 (3.0 credit hours)

Dissertation III: Chapter IV

The course is designed for the doctoral candidate to conduct and analyze research approved by the committee and described in the proposal. Doctoral candidates will demonstrate expertise conducting conceptually cogent and methodologically rigorous research, analyzing findings, making recommendations, and generating appropriate conclusions to finalize the dissertation. Dissertations are submitted to the researcher's committee for approval. After approval is received, with the guidance of the mentor, doctoral candidates complete their formal defense of the dissertation then prepare and submit the dissertation to the University for approval. Approved dissertations are prepared for publication. Researchers are provided with resources, guidance, and peer and mentor support as they write their dissertation. (Pre-requisite: DISS902, six (6) specialization courses)

DISS904 (3.0 credit hours)

Dissertation IV: Chapter V, Defense

The course is designed for the doctoral candidate to conduct and analyze research approved by the committee and described in the proposal. Doctoral candidates will demonstrate expertise conducting conceptually cogent and methodologically rigorous research, analyzing findings, making recommendations, and generating appropriate conclusions to finalize the dissertation. Dissertations are submitted to the researcher's committee for approval. After approval is received, with the guidance of the mentor, doctoral candidates complete their formal defense of the dissertation then prepare and submit the dissertation to the University for approval. Approved dissertations are prepared for publication. Researchers are provided with resources, guidance, and peer and mentor support as they write their dissertation. (Pre-requisite: DISS903)

DISS900 Continuing Dissertation Services (0 credit hours)

Continuation of DISS901, DISS902, or DISS904 (for candidates who have successfully defended but have not fulfilled all other requirements). Candidates will be enrolled in continuing dissertation services if the dissertation course is not completed within the term. Students will automatically be enrolled in DISS900 in order to receive dissertation services from their committee chair or committee members. Additionally, candidates who have successfully defended in DISS904 but have not fulfilled all other requirements will be automatically enrolled in DISS900.

DISS905 Continuing Dissertation Services II (1.5 credit hours)

Continuation of DISS904. If DISS904 is not completed within the term, students will automatically be enrolled in DISS905 in order to receive dissertation services from their committee chair or committee members. Candidates who have successfully defended but have not fulfilled all other requirements will be automatically enrolled in DISS900.

PAGE 291, PH.D. PSYCHOLOGY COURSE DESCRIPTIONS

Insert the following "EDUCATION SPECIALIST DEGREES":

PSYCHOLOGY**Doctor of Philosophy Degree****Major Course Requirements****Psychology Foundation Courses**

PSY701 (3.0 credit hours)

Research, Ethics, and Scholarly Writing

This class will serve as a foundational doctoral course providing advanced academic study and professional writing processes. Students will learn to analyze, evaluate, and give critical thought to the field of psychology as they examine current research articles, literature reviews and experimental results. They will learn the role of ethical standards in research and how these standards guide ethical decision making. APA style guidelines will be emphasized as students develop a perspective as a scholar-practitioner. The course will provide additional information and skills that will help the student navigate and incorporate the planning of their doctoral dissertation.

PSY710 (3.0 credit hours)

Cognitive and Affective Basis of Behavior

This course will present a review of the relationship between cognitive phenomena in research or laboratory settings and daily human cognition and affective experiences. It will explore how the structures and functions of the brain and nervous system contribute to cognitive behavior. Attention will be given to how the mind functions, perceives, attends, organizes, remembers to reason, aspects of human functioning (including emotions and moods) integrate with and influence cognitive processes.

PSY720 (3.0 credit hours)

Ethics, Law, and Psychology

This course explores the role of ethical standards and compares the codes and principles of different psychology specializations. Different philosophical theories that guide ethical decision-making will be examined and evaluated. Attention will be given to ethical and legal issues for practitioners and researchers. Ethical dilemmas will be discussed and evaluated.

PSY730 (3.0 credit hours)

Human Development

This course is an in depth exploration and evaluation of human development through all stages across the life-span of an individual. Students will explore and discuss contemporary empirical research findings regarding the concepts of cognitive, social, and emotional development as well as integrate the research into the various theories of development. Students will develop an understanding of diverse developmental pathways, the processes of risk and resilience across the lifespan, and life-events and life-transitions of a human being.

PSY750 (3.0 credit hours)

Theories of Learning and Motivation

Students will examine the variety of theories of human learning, focusing on using existing knowledge in motivation and learning to enhance teachers' instruction and students' learning. Emphasis will be placed on theoretical knowledge and application using current literature in the field. The course will emphasize learning, cognition, motivation, instruction, and how various theories can be implemented among diverse settings and learners. Students will analyze, discuss and give critical thought to the design of learning environments, the design and development of instruction including the role of technology, and the evaluation of learning taking biological, cultural, and contextual factors of learning into consideration.

PSY760 (3.0 credit hours)

Sociocultural Basis of Behavior

This course is designed to explore the scientific study of the way in which people's thoughts, feelings, and behaviors are influenced by the real or imagined presence of other people. Students will define, discuss, and evaluate the concepts of social psychology, its various theories, and its implications for behavior. Emerging trends and cutting edge research in the following topics will be evaluated: social aspects of self, persuasion, obedience, aggression, prejudice, stereotyping, social influence, and interpersonal attraction.

PSY770 (3.0 credit hours)

Cross-Cultural Methods of Tests and Measurements

This course focuses on the understanding, evaluating, and applying concepts of testing and psychological assessment. Students will evaluate the commonly administered testing methods and their functions, while judging their effectiveness based on multicultural variables. Students will synthesize this knowledge in an understanding of the need for reliability, validity, understanding test norms, and the importance of acknowledging and practicing diverse cultural sensitivity in testing and assessment.

Research Courses

RSM700 (3.0 credit hours)

Quantitative Research I

Quantitative Research I is a course in applied statistics introducing doctoral students to descriptive and inferential statistics for doctoral level research. Application of statistical tools and methods will be emphasized. Statistical tools covered will be measures of central tendency and variability, probability, randomization, normal distribution, t-distribution, F-distribution, confidence intervals, hypothesis testing, and correlation. Application to real-life and research based paradigms is made so students can become adept at interpreting empirical findings and develop the skills necessary to complete original research.

RSM800 (3.0 credit hours)

Quantitative Research II

Quantitative Research II prepares students to conduct quantitative research in the field of psychology. Students conduct critical literature reviews, evaluate research design, and design research methodology using quantitative

methods of data collection and analysis appropriate for research in psychology. Course topics include design of experimental and quasi-experimental research studies, survey design, and methods of analysis appropriate to these studies, including analyzing variance and multiple linear regressions. Emphasis is placed on applying computer based data analysis, statistical reasoning, understanding and use of quantitative research methods, ethical research practices, and practice in communicating research methods through scholarly interpretation, analysis, and writing.

RSM810 (3.0 credit hours)

Qualitative Research

Qualitative research helps us understand meaning when existing theory fails to explain a phenomenon. This course is designed to give the qualitative researcher the theory, method, and skill to apply a balanced approach to research. Course topics include the purpose and methods of various qualitative traditions as well as interviewing techniques, field observation, content analysis, historical analysis, focus groups, and questionnaire design. Qualitative data collection and analysis techniques are applied to research questions with a focus on understanding phenomenon not resolved by other research methodologies. Decision-making and research methodologies for expanding the body of knowledge are developed and applied.

RSM812 (3.0 credit hours)

Research Theory, Design, and Methods

This course will focus on the theoretical, methodological, and analytic issues found in various approaches to research in psychology. Specifically this course will provide students the core skills and understanding needed to be able to analyze a research problem, choose the best research methodology and design research at that doctoral level. The quantitative, qualitative, and mixed method research designs will be evaluated along with an exploration of the ethical issues related to both conducting research and the publication of the research results. The course will involve application and synthesizing of information through analysis of research across methodologies and through the development of research plans.

RSM820 (3.0 credit hours)

Advanced Research: Pre-Proposal and Literature Review

This course is designed for doctoral researchers to formulate of a problem statement, research question, and determine the most effective research methodology to use for their dissertation. The impact of the study on the profession and addition to the body of knowledge will be developed and defended. Students will also critically review and provide feedback to other doctoral researchers. Students will critically analyze the literature surrounding the research question and write a scholarly review of the research using best practices in APA documentation style. By the end of the course students will have completed the pre-proposal and submitted it to the committee for approval.

Teaching Core Courses

EDL751 (3.0 credit hours)

Leadership: Assessment and Program Evaluation

Assessment is becoming increasingly important in education today at all levels. Educational leaders must be prepared to design and conduct program evaluation and critically assess input from other sources. Assessment of student learning outcomes, classroom assessment techniques, assessment of teaching effectiveness, educational program evaluation, and evaluation of staff development are all important components of an educational leader's tool box. This course provides the student with the expertise necessary to effectively, ethically, and efficiently conduct educational evaluations and to present and communicate assessment and evaluation results to diverse stakeholder groups.

EDU740 (3.0 credit hours)

Curriculum Design

This course is an advanced study into the theory and application of curriculum design. Students will evaluate curriculum theory and trends reflectively to develop a personal curriculum and curriculum development philosophy. Using a systematic approach, students will design a curriculum including course preparation material, instructional techniques, use of technology, forms of evaluation, and assessment of curricula. Peer review and coaching will encourage critical thinking, analysis, and collaboration in the curriculum design process.

EPY816 (3.0 credit hours)

Advanced Seminar in Teaching Psychology

Through this course students will acquire the theory and skills needed to teach college-level courses. During this course students will explore teaching theory, research, syllabus construction, text selection, lecture planning, how to conduct an effective discussion, assessment development, use of technology in the classroom, and development of effective classroom management skills. Additionally students will have the opportunity to enter the classroom to put these skills into practice.

PSY780 (3.0 credit hours)

Educational Psychology

This course examines the psychology of learning with an emphasis on both learning and instruction. The fundamental theories of learning that will be explored throughout the course are cognitive, psychosocial, behavioral, and constructivist along with a look at moral development and theories of motivation. Additionally through a review of current practices in the classroom students will come to understand how these theories relate to practice and will develop their own theory of learning that will shape their personal instructional and assessment strategies.

Research Core Courses

RSM813 (3.0 credit hours)

Advanced Experimental Design in Psychology

This course focuses on complex experimental designs currently available to the research psychologist. Advanced longitudinal design and analysis will be covered. A strong emphasis will be on how to present methods and findings to a diverse audience of readers. Additional topics will cover other novel advanced experimental designs and current problems in the use of techniques in advanced experimental research design.

RSM814 (3.0 credit hours)

Policy Analysis

This course will focus on the application of quantitative methods to policy analysis, combining the study of research design, statistical methods, measurement, and program evaluation. The research focus will be major contemporary policy issues in the field of psychology to provide students with the knowledge and tools to define relevant research questions; to guide program design and operations, as well as to guide policy development; to map questions to appropriate methods of research; to judge the quality of research evidence; and to design strong analysis and evaluation strategies for various purpose. A significant focus will be on how to present quantitative findings to broad audiences.

RSM815 (3.0 credit hours)

Psychometrics

This course focuses on preparing graduates to conduct and apply research to discover and validate psychological processes and principles to optimize human performance. Students will refine sophisticated statistical and analytical capabilities to develop coherent and coordinated statistics, psychological testing, educational assessment, program evaluation and other applied research techniques. Quantitative and methodological skills needed to construct valid measurements and assessments, especially measurement theory, research design, evaluation, and qualitative tools will be applied.

RSM816 (3.0 credit hours)

Program Evaluation (Project Focused)

This course examines the nature, method and process of evaluative research focusing on developing and applying a program evaluation project. Ethical guidelines and legal issues are considered while working with the various research methodologies appropriate to the field of psychology.

PAGE 291, EDUCATION SPECIALIST COURSE DESCRIPTIONS

Insert the following sections before “MASTER OF ARTS DEGREE”:

EDUCATION SPECIALIST DEGREES

EDUCATIONAL LEADERSHIP

Education Specialist Degree

Major Course Requirements

EDL750 (3.0 credit hours)

Leadership: Theory and Management

Educational leaders must demonstrate the ability to practically apply leadership theory in management of educational institutions at all levels. This course is an in depth study of the theoretical and conceptual basis of educational leadership, its application to management and the roles and responsibilities of school leaders. Topics include contemporary theorists, self-reflection and self-analysis of personal strengths and weaknesses as a school leader, organizational change, motivation theory, decision-making strategies, ethics, and communication of organizational vision.

EDL751 (3.0 credit hours)

Leadership: Assessment and Program Evaluation

Assessment is becoming increasingly important in education today at all levels. Educational leaders must be prepared to design and conduct program evaluation and critically assess input from other sources. Assessment of student learning outcomes, classroom assessment techniques, assessment of teaching effectiveness, educational program evaluation, and evaluation of staff development are all important components of an educational leader's tool box. This course provides the student with the expertise necessary to effectively, ethically, and efficiently conduct educational evaluations and to present and communicate assessment and evaluation results to diverse stakeholder groups.

EDL752 (3.0 credit hours)

Leadership: Reform and Innovation

Educational leaders must be forward looking to build successful schools. They must also possess the critical review skills required to initiate and lead reform. This course focuses on change, behavior, leadership theories and futuring tools to gain a practical understanding of educational change processes and their associated impacts on educational practice. Critical thinking, scholarly inquiry, and research are integrated to develop theoretically grounded reform and innovation initiatives to meet current and future needs.

EDL753 (3.0 credit hours)

Leadership: Human Resources and Professional Development

School leaders today work toward developing professional learning communities in which students develop their academic potential. The primary resource necessary for successful acquisition of students' academic potential is the people who work in the institution. The successful school leader must recruit, orient, motivate, develop, evaluate, and sometimes terminate the human resources within the institution. This course is a research and application based evaluation of the planning and execution of human resource theory. Topics include ethical decision making, human resource law, diversity recruiting and retention, recruitment, selection, credentialing, and terminating employees. Professional and staff development best practices, trends, and issues are also applied.

EDU710 (3.0 credit hours)

Ethical and Legal Issues in Education/Leadership

This course is an intensive study focused on legal and ethical perspectives in education. Students will practice thinking logically, critically, conceptually, and analytically about legal and ethical issues affecting the field of education. Topics include liability, due process, search and seizure, employment law, discrimination, expression of controversial views, legal and ethical issues in school financing, NCLB, accreditation and regulatory issues, federal and state laws, FERPA, student rights, ADA, and legal aspects of technology. Ethical theories of problem-solving and resolution strategies, focusing on anticipating legal issues before they arise and utilizing methods and tools to prevent and resolve legal problems will be practiced.

EDU712 (3.0 credit hours)

Policy, Politics, and Community Relations

This course is an in depth an analysis of educational politics and policy and the role of community relations in school leadership. Emphasis is placed on theoretical and conceptual analysis of political behavior, legislation and political and policy trends affecting schools today. Educational stakeholders, their roles and impact on schools, and management of community relations are evaluated and assessed with a special emphasis on ethical decision-making.

EDU730 (3.0 credit hours)

Funding of Educational Institutions

This course examines public and private funding for educational institutions. Course topics include regulatory issues relating to funding, the role of politics in education funding, present and future funding patterns and school finance reform.

EDU740 (3.0 credit hours)

Curriculum Design

This course is an advanced study into the theory and application of curriculum design. Students will evaluate curriculum theory and trends reflectively to develop a personal curriculum and curriculum development philosophy. Using a systematic approach, students will design a curriculum including course preparation material, instructional techniques, use of technology, forms of evaluation, and assessment of curricula. Peer review and coaching will encourage critical thinking, analysis, and collaboration in the curriculum design process.

IDT720 (3.0 credit hours)

Designing Training and Performance Solutions

Educational managers are more effective if they possess a repertoire of training and performance tools with which to manage teachers, staff, and students. This course is designed to give educational leaders the theoretical and practical skills to design training and performance solutions, integrating instructional design techniques common in education today. Course topics include learning theories, instructional and performance design models, assessment and evaluation techniques, and training technology. Students design and implement an intervention by conducting a needs assessment, diagnosing the results, developing a solution for the performance gap, and continuously evaluating and assessing the intervention.

IDT721 (3.0 credit hours)

Leading Innovation Technology

This course is designed to provide educators the leadership and management decision-making skills for applications and advancements of technology in education. Learning theory forms the basis for using technology in the classroom and will be applied to assessing technological resources and innovation. Course topics include: instructional delivery using multimedia, matching technologies to outcomes, cost and funding of technology, and trends in instructional technology. Risks and threats with the wide availability of media (the internet, iPods, cell phones, and others) to classroom security and ethical student behavior are assessed and evaluated.

INSTRUCTIONAL DESIGN AND TECHNOLOGY

Education Specialist Degree

Major Course Requirements

EDU710 (3.0 credit hours)

Ethical and Legal Issues in Education/Leadership

This course is an intensive study focused on legal and ethical perspectives in education. Students will practice thinking logically, critically, conceptually, and analytically about legal and ethical issues affecting the field of education. Topics include liability, due process, search and seizure, employment law, discrimination, expression of controversial views, legal and ethical issues in school financing, NCLB, accreditation and regulatory issues, federal and state laws, FERPA, student rights, ADA, and legal aspects of technology. Ethical theories of problem-solving and resolution strategies, focusing on anticipating legal issues before they arise and utilizing methods and tools to prevent and resolve legal problems will be practiced.

EDU712 (3.0 credit hours)

Policy, Politics, and Community Relations

This course is an in depth an analysis of educational politics and policy and the role of community relations in school leadership. Emphasis is placed on theoretical and conceptual analysis of political behavior, legislation and political and policy trends affecting schools today. Educational stakeholders, their roles and impact on schools, and management of community relations are evaluated and assessed with a special emphasis on ethical decision-making.

EDU730 (3.0 credit hours)

Funding of Educational Institutions

This course examines public and private funding for educational institutions. Course topics include regulatory issues relating to funding, the role of politics in education funding, present and future funding patterns and school finance reform.

EDU740 (3.0 credit hours)

Curriculum Design

This course is an advanced study into the theory and application of curriculum design. Students will evaluate curriculum theory and trends reflectively to develop a personal curriculum and curriculum development philosophy. Using a systematic approach, students will design a curriculum including course preparation material, instructional techniques, use of technology, forms of evaluation, and assessment of curricula. Peer review and coaching will encourage critical thinking, analysis, and collaboration in the curriculum design process.

IDT720 (3.0 credit hours)

Designing Training and Performance Solutions

Educational managers are more effective if they possess a repertoire of training and performance tools with which to manage teachers, staff, and students. This course is designed to give educational leaders the theoretical and practical skills to design training and performance solutions, integrating instructional design techniques common in education today. Course topics include learning theories, instructional and performance design models, assessment and evaluation techniques, and training technology. Students design and implement an intervention by conducting a needs assessment, diagnosing the results, developing a solution for the performance gap, and continuously evaluating and assessing the intervention.

IDT721 (3.0 credit hours)

Leading Innovation Technology

This course is designed to provide educators the leadership and management decision-making skills for applications and advancements of technology in education. Learning theory forms the basis for using technology in the classroom and will be applied to assessing technological resources and innovation. Course topics include: instructional delivery using multimedia, matching technologies to outcomes, cost and funding of technology, and trends in instructional technology. Risks and threats with the wide availability of media (the internet, iPods, cell phones, and others) to classroom security and ethical student behavior are assessed and evaluated.

IDT723 (3.0 credit hours)

Instructional Design Theory

Students will investigate and apply a range of instructional design theories and design processes, from analysis through evaluation and implementation. Contemporary theory and instructional design systems will be used in the process of developing a course plan, instructional strategies, course assessment, and evaluation processes. The course concepts are applicable to K-12, higher education, and training environments.

IDT724 (3.0 credit hours)

Analysis and Design of Technology-Based Learning Models

Students will evaluate technology enhanced learning models on a continuum ranging from the Socratic Method to independent study. At each point along the continuum students will identify and examine appropriate course constructs, support structures, role of student and instructor, application of technologies, and creating a balance that optimizes student success and completion rates.

IDT725 (3.0 credit hours)

Instructional Multimedia

Students will create a multimedia lesson plan for integration into K-12, higher education, or organizational training, using audio and video computer hardware and software in supporting interactive instruction. Video production, social networking, and other web-based applications will be used as an alternative form of multimedia.

IDT726 (3.0 credit hours)

Current Issues in Instructional Technology

This course provides an in-depth exploration, analysis, and discussion of trends and issues that will impact the future of instructional design. The contributions of key instructional design theorists, futurists, and scholars will be used in predicting the future of instructional design and related fields.

PAGE 293, MASTER DEGREE COURSE DESCRIPTIONS—MASTER OF ACCOUNTANCY

Insert the following before MASTER OF BUSINESS ADMINISTRATION DEGREES:

MASTER OF ACCOUNTANCY DEGREE

Major Course Requirements

ACG 5135 (3.0 credit hours)

Advanced Accounting Theory

Students study the theoretical structure of accounting, with special attention to assets, liabilities and income recognition and measurement. In addition, students will discuss pronouncements of professional accounting organizations in the current standard setting environment. Program Co-requisite

ACG 5255 (3.0 credit hours)

Advanced International Accounting Concepts

Students study the conceptual framework for the preparation and presentation of financial statements under International Financial Reporting Standards (IFRS). This course will compare and contrast US Generally Accepted Accounting Principles (GAAP) and IFRS for select accounting transactions. Students will be introduced to the measurement and accounting for the operating results and financial position of multinational corporations involving transactions with foreign currencies. The course also covers foreign exchange risk management techniques in hedging activities. Co-requisite: ACG 5135

ACG 5835 (3.0 credit hours)

Ethical Issues in Accounting

Students are introduced to the guidelines for ethical professional practice as it relates to the accounting profession and the application of these guidelines as they relate to real-world case situations. Emphasis is placed on various accounting professional codes of ethics and related legal responsibilities that guide accounting professionals in the performance of their duties. Co-requisite: ACG 5135

ACG 6138(3.0 credit hours)

Advanced Financial Reporting and Accounting Concepts

Students study advanced topics in financial reporting and accounting that focus on corporate reporting, current financial reporting and disclosure requirements. Co-requisite: ACG 5135

ACG 6367 (3.0 credit hours)

Advanced Cost/Managerial Accounting

Students study the mechanics of managerial accounting. Students learn to improve managerial decisions by constructing decision models and measuring information. Students also use ratio analyses to compare current results to prior results and for comparison with competitors. Co-requisite: ACG 5135

ACG 6505 (3.0 credit hours)

Advanced Governmental and Fund Accounting

A study of accounting local, state, and federal government units and non-profit entities such as educational institutions and health care organizations. The course covers the classification and use of fund accounting to insure

the efficient use and tracking of public funds in such entities, including budgeting, purchasing, and financial activities, and the presentation of financial reports by these types of organizations. Co-requisite: ACG 5135

ACG 6625 (3.0 credit hours)

Advanced Accounting Information Systems

This course provides students with the knowledge of how accounting information systems function in business organizations. Transaction flowcharting and internal controls of the revenue, expenditure, and conversion cycles are covered in detail. Attention is also focused on computerized (EDP) controls, issues related to the auditing of information systems in business organizations and the special techniques of auditing required in EDP accounting systems. Co-requisite: ACG 5135

ACG 6635 (3.0 credit hours)

Advanced Auditing Theory and Applications

Students study the theory of auditing and development of audit programs; procedures for obtaining audit evidence and auditor responsibilities under both the Securities and Exchange Commission (SEC) and the American Institute of Certified Public Accountants (AICPA). Co-requisite: ACG 5135

ACG 6685 (3.0 credit hours)

Fraud Examination Concepts

Students study theory and techniques relating to fraud auditing and fraud examination. This course focuses on specific areas related to the recording, reporting, and prosecution of fraudulent activities, internal auditor responsibilities in the audit for fraud, and fraud detection and prevention techniques. Co-requisite: ACG 5135

ACG 6686 (3.0 credit hours)

Contemporary Issues in Fraud Examination

Students study the use of technology for the detection and prevention of financial fraud and the examination of emerging practices, regulatory trends and current issues facing anti-fraud professionals. Co-requisite: ACG 5135

ACG 6687 (3.0 credit hours)

Fraud Examination Conduct and Procedures

Students study theory with an emphasis on the conduct of fraud examinations, including a discussion of specific procedures used in forensic accounting examinations and the reasoning behind the use of these procedures. Coverage extends to prevention, investigation, and deterrence of specific types of fraud committed against organizations and individuals. Co-requisite: ACG 5135

ACG 6688 (3.0 credit hours)

Fraud Examination and the Legal Environment

Students study theory with an emphasis on federal legislation related to fraud examinations including coverage of laws that preserve the rights of individuals suspected of committing fraud and laws that govern civil and criminal prosecutions, the admittance of evidence, and the testimony of expert witnesses. Co-requisite: ACG 5135

ACG 6808(3.0 credit hours)

Contemporary Issues in Accounting

Students integrate their accounting knowledge through critical analysis, practical research assignments and cases including controversial and emerging practices. Co-requisite: ACG 5135

ACG 6816 (3.0 credit hours)

Professional Accounting Research

Students examine the uses of professional literature and technology for problem solving in financial accounting, auditing and taxation contexts. Prerequisite: A minimum of thirty credits in program, must be taken in the final term of enrollment and may be taken concurrently with last core course.

BUL 6831 (3.0 credit hours)

Advanced Contract and UCC Law

Students will research the ethical behavior and concepts of law as applied to the accounting profession, including contracts, the uniform commercial code (UCC), agency, debtor-creditor relationships, business structure, and governmental regulations of business. Co-requisite: ACG 5135

TAX 6877(3.0 credit hours)

Special Topics in Taxation

Tax research as applied to both closed fact and controllable fact cases. Methods for locating and assessing relevant authority on specific tax questions are emphasized. The course will include a survey of the rules administering the practice before the Internal Revenue Service and the various federal income tax provisions applicable to filing, examination, and appeals. Co-requisite: ACG 5135

PAGE 293, COURSE DESCRIPTIONS—MBA

Replace this section with the following:

MASTER OF BUSINESS ADMINISTRATION DEGREES

Major Course Requirements

ACG501 (3.0 credit hours)

Survey of Accounting

Students learn an integral system of financial accounting. Topics include accounting information and business decision-making, financial reporting, time value of money, ratio analysis and financial statements. Additionally, students learn to analyze and present financial accounting data. Co-requisite: MAN571

ACG5075(3.0 credit hours)

Accounting for Decision Making

Students learn to analyze and present financial and managerial accounting data. Topics include measurement of costs, planning, forecasting, budgeting, cost/revenue/profit analysis, Sarbanes-Oxley Act and corporate trust. Co-requisites: MAN571 Prerequisite: ACG501

FIN521 (3.0 credit hours)

Financial Management

Students learn fundamental principles and concepts of financial management. Various tools and cases are used to assist and train financial managers in decision-making. Topics include the analysis of risk and return, valuation of financial assets, capital budgeting applications, capital structure management, mergers and acquisitions, leveraged buyouts and working capital management. Co-requisite: MAN571 Prerequisite: ACG501

MKT531 (3.0 credit hours)

Marketing Management

Students gain the knowledge and skills necessary to understanding the critical role of marketing in successful organizations. Topics include segmentation analysis, target markets, positioning, marketing mix elements, supply chain, marketing communication and pricing. Co-requisite: MAN571

MAN542 (3.0 credit hours)

Business Research Methods

Students learn to conduct qualitative and quantitative research that contributes to business decision-making. Practical knowledge includes secondary data searches; questionnaire, interview, and case study design; data analysis and display; and written and oral reports. Business research ethics will be addressed. Co-requisite: MAN571

MAN551 (3.0 credit hours)

International Business

Students learn key aspects of the international business environment and their impact on creating opportunities and challenges for business. Topics include theories, institutions, conventions and agreements affecting international

business, as well as effective strategies for improving business performance in the global market. Practical experience is gained through the analysis of real-world cases and projects. Co-requisite: MAN571

MAN562 (3.0 credit hours)

Business Information Systems

Case based analysis of a broad range of managerial as well as technical issues. Topics include technology, information systems high-level architecture, competitive advantage of information technology, software, information flow within organizations, electronic commerce systems, leadership decision support systems, ethical and legal aspects of IS, and successful development of business solutions. Co-requisite: MAN571

MAN571 (3.0 credit hours)

Organizational Behavior

Students focus on three factors that contribute to successful organizational performance: individual behavior, group/team behavior and organization-wide processes. Topics include ethics, diversity, communication, motivation, leadership, conflict management and organizational culture, structure and change. Learning activities emphasize practical application of organizational theory.

MAN573 (3.0 credit hours)

Project Management

This course provides a deep understanding of project management processes, behavioral and technical tools for effective planning, scheduling, controlling projects activities, managing and implementing projects. Students learn applications and how to develop a project through several stages of implementation and how to manage projects in modern organizations. Some of the key areas include the Critical Path Method (CPM), Program Evaluation and Review Technique (PERT), Gantt Charting, and communication processes as they apply to operational and service activities in today's modern business and management operations. Co-requisite: MAN571

ECO581 (3.0 credit hours)

Managerial Economics

Students are given an overview of key influences in a company or industry task environment. The course analyzes the potential impact of these influences on profits and alternative strategies which are profitable and available to managers in a competitive environment. Topics include consumer behavior and its impact on demand and revenue, fixed and variable costs of production, competitive and non-competitive markets and their implications for business strategy and profitability and the importance of resource markets for labor and capital. Co-requisite: MAN571

ACCOUNTING CONCENTRATION

ACG 6138(3.0 credit hours)

Advanced Financial Reporting and Accounting Concepts

Students study advanced topics in financial reporting and accounting that focus on corporate reporting, current financial reporting and disclosure requirements. Prerequisites: BA in Accounting or equivalent. Must be taken after core courses are completed or concurrently with last core course.

ACG 6635 (3.0 credit hours)

Advanced Auditing Theory and Applications

Students study the theory of auditing and development of audit programs; procedures for obtaining audit evidence and auditor responsibilities under both the Securities and Exchange Commission and the AICPA. Prerequisites: BA in Accounting or equivalent. Must be taken after core courses are completed or concurrently with last core course.

ACG 6808(3.0 credit hours)

Contemporary Issues in Accounting

Students integrate their accounting knowledge through critical analysis, practical research assignments and cases including controversial and emerging practices. Prerequisites: BA in Accounting or equivalent. Must be taken after core courses are completed or concurrently with last core course.

TAX 6877(3.0 credit hours)

Special Topics in Taxation

Tax research as applied to both closed fact and controllable fact cases. Methods for locating and assessing relevant authority on specific tax questions are emphasized. The course will include a survey of the rules administering the practice before the Internal Revenue Service and the various federal income tax provisions applicable to filing, examination, and appeals. Prerequisites: BA in Accounting or equivalent. Must be taken after core courses are completed or concurrently with last core course.

MBA699 (3.0 credit hours)

Capstone: Business Strategies

Serving as the capstone course for the MBA program, this course serves two purposes: First, to address emerging business topics; and, second, to serve as an integration mechanism for the MBA curriculum. The primary focus of the course is the application of strategic management for competitive advantage. Prerequisites: All MBA core courses. Must be taken in final term of enrollment. May be taken concurrently with last concentration course.

HEALTH SERVICES MANAGEMENT CONCENTRATION

HSM 691 (3.0 credit hours)

Quality Management in Healthcare

This course provides the student an overview of the theory, principles and techniques of quality management in healthcare settings. Topics include but are not limited to quality assurance, quality improvement, outcomes assessment, and tools commonly used to enhance quality of service and care in the healthcare industry.

HSM692 (3.0 credit hours)

Strategic Management of Health Services Organizations

Students integrate concepts learned in core and concentration courses with relevant professional and personal experience and apply this knowledge to a significant, real-world, leadership-related business challenge. The focus of the course will be on the role and function of strategic planning as it pertains to health care organizations. Students will scrutinize strategic plans and organizational strategies in relation to the complexity of the United States healthcare system. Must be taken after core courses are completed or concurrently with last core course.

HSM693 (3.0 credit hours)

Corporate Compliance in Healthcare

This course provides the student the basic structure of a corporate compliance program including laws and penalties surrounding compliance and monitoring/auditing practices. The course will identify areas of concern and risk for various healthcare settings. Must be taken after core courses are completed or concurrently with last core course.

MBA699 (3.0 credit hours)

Capstone: Business Strategies

Serving as the capstone course for the MBA program, this course serves two purposes: First, to address emerging business topics; and, second, to serve as an integration mechanism for the MBA curriculum. The primary focus of the course is the application of strategic management for competitive advantage. Prerequisites: All MBA core courses. Must be taken in final term of enrollment. May be taken concurrently with last concentration course.

INTERNATIONAL BUSINESS CONCENTRATION

ECO651 (3.0 credit hours)

International Trade

Students gain knowledge of important theories, concepts, institutions and issues affecting international trade. Topics include theories on specialization and trade, reasons for and types of trade barriers, exchange rate systems, measures of balance of trade and payments, trade agreements and the role of international institutions such as the World Trade Organization, World Bank and International Monetary Fund. Students gain practical understanding through the use of real-world cases and projects. Prerequisites: Must be taken after core courses are completed or concurrently with last core course.

MKT652 (3.0 credit hours)

International Marketing Management

Students examine marketing practices in a global environment. They examine types of decisions that marketing managers make when expanding into a foreign market. The course assumes familiarity with general marketing management and utilizes this as a base to develop insights and understanding of international marketing. It relates various economic, social, political, religious and legal dimensions of the world to the marketplace. Special emphasis is placed on the impact of cultural values and political systems on businesses operations, business transactions and global marketing strategies. Prerequisites: Must be taken after core courses are completed or concurrently with last core course.

FIN653 (3.0 credit hours)

International Financial Management

Students gain an understanding of international financial management essential to foreign investors and to international business executives. Topics include international monetary system, risk and returns of international firms, exchange rates for financial reporting, currency exposure, international equity and bond markets and capital budgeting for foreign investment. Other important topics include international merger and acquisition, leveraged buyouts and financing strategy in building global businesses. Prerequisites: Must be taken after core courses are completed or concurrently with last core course.

MBA699 (3.0 credit hours)

Capstone: Business Strategies

Serving as the capstone course for the MBA program, this course serves two purposes: First, to address emerging business topics; and, second, to serve as an integration mechanism for the MBA curriculum. The primary focus of the course is the application of strategic management for competitive advantage. Prerequisites: All MBA core courses. Must be taken in final term of enrollment. May be taken concurrently with last concentration course.

LEADERSHIP FOR MANAGERS CONCENTRATION

MAN671 (3.0 credit hours)

Leadership Development

Students develop leadership competencies by examining the behaviors, skills and styles of effective leaders and use them as benchmarks to assess their own strengths and needs for improvement. Topics include participative leadership, coaching and empowerment; power and influence strategies; contingency models of leadership and innovation-oriented leadership. Personal leadership action plans are used to document transition to desired behaviors. Prerequisites: Must be taken after core courses are completed or concurrently with last core course.

MAN672 (3.0 credit hours)

Human Resources Management

Students learn to create competitive advantage by maximizing employee effectiveness and efficiency. Leadership involves attracting, selecting and retaining exceptional job candidates; training and developing employees to meet current and future organizational needs; managing and improving performance; and building high-performance work teams. Research requires analysis and resolution of human resource challenges facing today's organizations. Prerequisites: Must be taken after core courses are completed or concurrently with last core course.

MAN673 (3.0 credit hours)

Organizational Change

Students apply organizational change theory to complex organizational issues. Leaders must be able to create a vision for change, diagnose organizational problems, implement organizational redesign and cultural change, and measure effectiveness. Case studies emphasize the need to manage resistance to change and reinforce new behaviors. Prerequisites: Must be taken after core courses are completed or concurrently with last core course.

MBA699 (3.0 credit hours)

Capstone: Business Strategies

Serving as the capstone course for the MBA program, this course serves two purposes: First, to address emerging business topics; and, second, to serve as an integration mechanism for the MBA curriculum. The primary focus of the

course is the application of strategic management for competitive advantage. Prerequisites: All MBA core courses. Must be taken in final term of enrollment. May be taken concurrently with last concentration course.

MARKETING CONCENTRATION

MKT632 (3.0 credit hours)

Marketing Research Methods

Students gain an understanding of various marketing information needs of an organization. Topics include definition of research objectives, data sources, research design, interpretation of data and evaluation of research proposals and results. The course focuses on applying marketing research concepts to solving real-world problems through applied research exercises and experiential research development projects. Prerequisites: Must be taken after core courses are completed or concurrently with last core course.

MKT633 (3.0 credit hours)

Promotional Strategy

Students learn the formulation and execution of promotional strategy of a marketing plan, thus developing strategic thinking in all aspects of marketing communication. Integrated promotional strategy topics include advertising, sales promotion, personal selling, direct marketing and public relations and publicity. The course includes a variety of application exercises such as cases and real-world promotional projects. Prerequisites: Must be taken after core courses are completed or concurrently with last core course.

MKT634 (3.0 credit hours)

Advanced Consumer Behavior

An in-depth study of how psychological, sociological, and cultural variables influence buying behavior and marketing strategy development. It focuses on identifying the relevant behavioral variables in a given product purchase situation and determining how marketing strategy can be adapted to meet the ways in which consumers perceive, select, and buy. It uses advanced cases and a field study project. Prerequisites: Must be taken after core courses are completed or concurrently with last core course.

MBA699 (3.0 credit hours)

Capstone: Business Strategies

Serving as the capstone course for the MBA program, this course serves two purposes: First, to address emerging business topics; and, second, to serve as an integration mechanism for the MBA curriculum. The primary focus of the course is the application of strategic management for competitive advantage. Prerequisites: All MBA core courses. Must be taken in final term of enrollment. May be taken concurrently with last concentration course.

PAGE 304, COURSE DESCRIPTIONS—MS INFORMATION SECURITY

Insert the following above NURSING:

INFORMATION SECURITY

Major Course Requirements

ISS500 (3.0 credit hours)

Operating Systems and Application Support

This introductory course is designed to provide students with a brief historical perspective of the evolution of operating systems over the last fifty years, and then cover the major components common to most operating systems today including application support in distributed systems. Particular emphasis will be given to three major OS subsystems: process management (processes, threads, CPU scheduling, synchronization, and deadlock), memory management (segmentation, paging, swapping), and file systems.

ISS510 (3.0 credit hours)

Enterprise Information Systems and Networks

This course provides a set of latest approaches in designing IT infrastructures aligning them with enterprise business activities at the architectural level, including business architecture, information architecture, solution architecture,

and technology architecture. Topics include: virtualization, OSI model. TCP/IP, IPv4, IPv6, modeling techniques used to represent logical and conceptual web enabled information system designs, access mechanisms, storage pools, encryption and data protection and various networking technologies in LANs/MANs/WANs. Prerequisite: ISS500

ISS520 (3.0 credit hours)

Database Systems and Security

This course is designed to provide students with an understanding of database management system fundamentals, data models, design, implementation and processing. Topics include the relational model and languages, database analysis and design, distributed systems, storage structures, data definition languages, and data manipulation languages for the relational approach to database management. Prerequisite: ISS500

ISS630 (3.0 credit hours)

Secure Client-Server Computing

This course deals with the problems encountered in the design and implementation of distributed information systems. Students will create an environment that supports applications executing on a client-server system and the issues involving software security, methods of distributing client defense, and hardening server resources. Additional topics include: HTTP protocol, dynamic HTML, SSL, IPsec, common gateway interface (CGI) programming, Java applets, server-side programming and other technologies developed for the Web. Prerequisites: ISS500, ISS510

ISS640 (3.0 credit hours)

Cryptography

This course provides a comprehensive discussion on the various cryptographic methods employed to maintain the confidentiality, integrity and availability of data. Topics include pseudorandom functions and permutations, block ciphers, symmetric encryption schemes, security of symmetric encryption schemes, hash functions, message authentication codes (MACs), PKI, public-key (asymmetric) encryption, digital signatures, security of asymmetric encryption and digital signature schemes. Prerequisites: ISS500, ISS510

ISS550 (3.0 credit hours)

Software Engineering

This course is designed to teach students about formal software engineering principles and practices required for the development of information systems, application software and embedded systems. Topics include: structured and object-oriented analysis, design and implementation of information systems; distributed information systems; information system life-cycle models, platforms and security. Prerequisite: ISS500

ISS660 (3.0 credit hours)

Wireless Infrastructure and Security

This course provides graduate level background in the design, implementation and management of security in wireless WANs, MANs and LANs. Students will learn about IEEE 802.11 and 802.16 standards, modulation, propagation, antennas, EMI, RFI, access control methods, key encryption, and site survey tools. Additional special focus topics include penetration testing, attack methods, WEP, WPA, TKIP, Key escrow, wireless sensor networks, and industrial wireless protocols. Prerequisites: **ISS500**, ISS510, ISS640

ISS670 (3.0 credit hours)

Advanced Network Security

This course involves analysis and design of network security hardware/software defense techniques and countermeasures. Topics include protocol vulnerabilities, network defense techniques such as designing firewall systems, content filters, network appliances, tunneling, network access models, biometrics, TCP/IP security in IPv4 and IPv6, protocol analyzers, sniffers, penetration testing and layered perimeter security designs. Prerequisites: ISS500, ISS510, ISS640, ISS660

ISS680 (3.0 credit hours)

Intrusion Detection and Prevention Systems

This course focuses on the use of intrusion detection (IDS) and prevention (IPS) systems as formal defense strategies to detect, study, and protect enterprise networks. Topics include: history and state of the art of intrusion detection, the principles and techniques of intrusion detection, anomaly and misuse detection for both host and network environments, network forensics, malware defense, security polices and legal issues surrounding the use of intrusion detection. Prerequisites: ISS500, ISS510, ISS640, ISS660, ISS670

ISS690 (3.0 credit hours)

Capstone project in Information Security

This course integrates all of the knowledge acquired in the previous courses and serves as a capstone in information security. The class utilizes case studies, project management strategies, application development and information system assessment to design a secure information system infrastructure. Prerequisites: Completion of all required core courses

Elective Courses - 6 credits

ISS655 (3.0 credit hours)

Global E-Commerce and Privacy Assurance

This course is designed to summarize the concepts of corporate E-Commerce systems on the Internet and mechanisms used to ensure privacy. Students will evaluate the ethical challenges faced by individuals and organizations in the application of information assurance and the dynamic state of the law as it applies to behavior in cyberspace. Topics include: History of E-Commerce, E-Commerce business models, Internet Technologies, Online payment systems and E-Commerce security. Prerequisites ISS500, ISS510

ISS675 (3.0 credit hours)

Survey of Computer Languages

This course is designed to teach students about the formal, functional, and practical issues of design and implementation of imperative, functional, and declarative languages. The course will touch on a wide variety of languages, both past and present, with an emphasis on modern imperative languages, such as C++, Java and C#. Prerequisites ISS500, ISS510

ISS685 (3.0 credit hours)

E-Discovery, Network and Computer Forensics

This course focuses on the developing issues, rules and practices involving the application of e-discovery, digital evidence and computer forensics in recovering and preserving potential digital evidence. Students will compile evidence utilizing various tools and methodologies used in the examination of computer and electronic corporate records. Topics include: fundamentals of computer and network forensics, forensic duplication and analysis, reconstruction of computer activities, forensics tools, and investigating cyber-based crimes. Prerequisites ISS500, ISS510, ISS660, ISS670

ISS695 (3.0 credit hours)

Risk Analysis and Vulnerability Assessment

This course prepares students to schematize the issues surrounding the vulnerabilities and risks inherent in the operation of information systems. Students will learn how to use a risk analysis matrix for performing both quantitative and qualitative risk analysis in an enterprise information system. Topics include: developing incident response teams, creating disaster recovery and incident response procedures, business continuity planning and mitigating data loss. Prerequisites ISS500, ISS510, ISS640, ISS660, ISS670, ISS680

PAGE 304, MS MANAGEMENT COURSE DESCRIPTIONS

Insert the following before the MS Nursing course descriptions:

MANAGEMENT

Major Course Requirements

MAN562 (3.0 credit hours)

Business Information Systems

Case based analysis of a broad range of managerial as well as technical issues. Topics include technology, information systems high-level architecture, competitive advantage of information technology, software, information flow within organizations, electronic commerce systems, leadership decision support systems, ethical and legal aspects of IS, and successful development of business solutions. Co-requisite: MAN571

MAN571 (3.0 credit hours)

Organizational Behavior

Students focus on three factors that contribute to successful organizational performance: individual behavior, group/team behavior and organization-wide processes. Topics include ethics, diversity, communication, motivation, leadership, conflict management and organizational culture, structure and change. Learning activities emphasize practical application of organizational theory. Program Co-requisite

MAN573 (3.0 credit hours)

Project Management

This course provides a deep understanding of project management processes, behavioral and technical tools for effective planning, scheduling, controlling projects activities, managing and implementing projects. Students learn applications and how to develop a project through several stages of implementation and how to manage projects in modern organizations. Some of the key areas include the Critical Path Method (CPM), Program Evaluation and Review Technique (PERT), Gantt Charting, and communication processes as they apply to operational and service activities in today's modern business and management operations. Co-requisite: MAN571

MAN 583 (3.0 credit hours)

Strategic Planning and Implementation

Students learn how to evaluate the business environment, assess an organization's strengths, capabilities, and decide on competing strategies to implement for the organization. Students also acquire the skills to conduct business planning, organizational analysis, comparing an organization's internal capabilities with the external opportunities and threats, building on organizational strengths, exploiting opportunities, minimizing weaknesses and avoiding environmental threats. Along with decision-making process that formulates strategic plans, acquiring and allocating resources, and applying strategic control to ensure that the plans are carried out with goals and objectives achieved. Co-requisite: MAN571

MAN671 (3.0 credit hours)

Leadership Development

Students develop leadership competencies by examining the behaviors, skills and styles of effective leaders and use them as benchmarks to assess their own strengths and needs for improvement. Topics include participative leadership, coaching and empowerment; power and influence strategies; contingency models of leadership and innovation-oriented leadership. Personal leadership action plans are used to document transition to desired behaviors. Co-requisite: MAN571

MAN672 (3.0 credit hours)

Human Resources Management

Students learn to create competitive advantage by maximizing employee effectiveness and efficiency. Leadership involves attracting, selecting and retaining exceptional job candidates; training and developing employees to meet current and future organizational needs; managing and improving performance; and building high-performance work teams. Research requires analysis and resolution of human resource challenges facing today's organizations. Co-requisite: MAN571

MAN673 (3.0 credit hours)

Organizational Change

Students apply organizational change theory to complex organizational issues. Leaders must be able to create a vision for change, diagnose organizational problems, implement organizational redesign and cultural change, and measure effectiveness. Case studies emphasize the need to manage resistance to change and reinforce new behaviors. Co-requisite: MAN571

MAN 674 (3.0 credit hours)

Global Human Resources Management

Students learn to create best practices in the global human resources field using effective leadership towards staffing operations in order to achieve sustainable global growth. The process of recruiting, selecting, training, and developing staff for global assignments is examined. A thorough understanding of global compensation, career issues, and global industrial relations is analyzed so that students could analyze world issues, laws, ethics, cultures and apply their skills to an effective global human resources management strategy. Co-requisite: MAN571

MAN 675 (3.0 credit hours)

Global Law and Employee Relations

The global law and employee relations course allows students to assess the impact of the legal and regulatory environment of global businesses ethics. Students will examine disparate legal systems; analyze the impact of cross-cultural businesses, and survey protocols in global leadership. Students will demonstrate knowledge of employment law and its impact on global firms and analyze, assess, and evaluate health, reward, and compensation systems in global organizations. Co-requisite: MAN571

MAN 676 (3.0 credit hours)

Managerial Communications

Students will enhance their professional management communications skills through reading, writing, and practicing their oral and written presentation skills. Students will explore communications strategies and techniques for communicating using traditional methods and emerging methods. Co-requisite: MAN571

MAN 690 (3.0 credit hours)

Program Capstone

Serving as the capstone course for the Master of Science in Management program, this course addresses emerging management topics and serves as an integration mechanism for the curriculum by integrating leadership skills, strategic planning and implementation skills, the human resources aspect of management, managerial communication and the ability to develop other leaders within the organization and implement change effectively. Taken in the last term of enrollment.

PAGE 318, BA ACCOUNTING COURSE DESCRIPTIONS

Replace this section with the following:

ACCOUNTING

Bachelor of Arts Degree

Major Course Requirements

ACG1001 (3.0 credit hours)

Accounting Principles I

Defines objectives of accounting and their relationship to business through fundamental concepts and principles. Topics include theories of debits and credits, classification of accounts, journalizing, preparation of financial statements and the use of a trial balance. Accrual method accounting procedures are discussed with end-of-year procedures and financial statements. The practice problems review the complete operation of a small business.

ACG2011 (3.0 credit hours)

Accounting Principles II

Presents accounting principles and concepts applicable to receivables, fixed assets, payroll, cash flow, financial analysis and accounting for partnerships and corporations. The practice problems review the complete operation of a small corporation. Prerequisite: ACG1001

ACG2062 (3.0 credit hours)

Accounting Information for Business Decisions

Identifies how accounting information is used in making business decisions. Students enhance computer skills using software programs to solve accounting problems. Prerequisite: ACG2011

ACG4101 (3.0 credit hours)

Intermediate Accounting I

Underlying concepts and ethical, regulatory and business environment of financial reporting with an emphasis on measurement, valuation and presentation of typical asset-related items. Prerequisite: all lower division accounting and tax courses

ACG4111 (3.0 credit hours)

Intermediate Accounting II

Presents underlying concepts and ethical, regulatory and business environments of financial reporting. Topics include an emphasis on measurement, valuation and presentation of typical liability and equity-related items. Prerequisite: ACG4101

ACG4201 (3.0 credit hours)

Advanced Accounting

Presents underlying concepts and ethical, regulatory and business environment of financial reporting with emphasis on accounting for various business structures and business combinations. Prerequisite: ACG4111

ACG 4253 (3.0 credit hours)

International Financial Reporting

The course expands upon the conceptual framework for the preparation and presentation of financial statements and looks at the differences between current US GAAP and IFRS. This course will also discuss international ethical conduct as it relates to accounting. Prerequisite: ACG4201

ACG4342 (3.0 credit hours)

Advanced Managerial/Cost Accounting

Discusses the determination and control of production costs, job order and process systems, actual and standard costs, budgetary control, performance measurement, ethics and short-run decision models. Prerequisite: ACG4111

ACG4401 (3.0 credit hours)

Accounting Information Systems

Introduces the study of concepts and terminology of accounting information systems and their use in decision making in accounting and auditing. The course also covers Information Technology (IT) fundamentals, responsibilities and business implications. Prerequisite: ACG4651

ACG4501 (3.0 credit hours)

Governmental and Institutional Accounting

Presents budgeting, accounting and reporting standards and practices for government and other not-for-profit entities. Prerequisite: ACG 4111

ACG4651 (3.0 credit hours)

Auditing I

Standards and procedures of auditing financial information, ethics and responsibilities of auditors, planning, collection and documentation of audit evidence, reporting and auditing standards Prerequisite: ACG4111

ACG4671 (3.0 credit hours)

Auditing II

This course covers the application of the audit process learned in Auditing I. The course also provides detail on sampling and audit communications. Prerequisite: ACG4651

BUL1240 (3.0 credit hours)

Business Law

Presents fundamental principles of law applicable to business transactions. Topics include contracts, sales contracts (UCC Codes), government regulations, commercial paper, property bailments, agency, debtor-creditor relations, real property and insurance.

BUL3130 (3.0 credit hours)

Legal and Ethical Environment of Business

Presents principles of law and ethics that arise in the business environment. Topics include the Federal Corrupt Practices Act, product liability, street crime vs. white collar crime, government regulation of financial institutions, at-will employment and employer/employee relationships, agency and principals, employee safety and fiduciary duty.

ECO4223 (3.0 credit hours)

Money and Banking

A general survey of the economics of money and banking covering the evaluation, nature, and functions of money, the nature of banking and its regulation; monetary standards; structure and functions of the Federal Reserve System; monetary policy, monetary theory and the price level; and the role of banking and money in international finance.

FIN2001 (3.0 credit hours)

Financial Management

Examines corporate finances through organizational structure, practices and policies. Topics include ratio analysis, leverage, cash budgeting, capital structure, NPV, the CAPM, valuation concepts and analysis of financial statements. Prerequisite: ACG2011

FIN3400 (3.0 credit hours)

Principles of Managerial Finance

Presents an introductory overview of the world of corporate financial management with emphasis on the time value of money and the requisite net present value adjustment for the cost of capital and/or judging future returns on investment. This perspective then leads to risk analysis, capital budgeting, cost of capital and financial management. Prerequisite: FIN2001

MAN1021 (3.0 credit hours)

Principles of Management

Presents a combination of current and traditional views of management organized around a functional and process approach. Topics include basic management principles and theory and analysis of management functions in planning, organizing, staffing, directing and controlling.

MAN3025 (3.0 credit hours)

Introduction to Management and Organizational Behavior

Introduces managerial principles including planning, organizing, staffing, leadership and control techniques. A behavioral science formulation of individual needs, motivation and group processes is utilized.

MAN4583 (3.0 credit hours)

Project Management

Emphasizes the importance of project management and the factors involved in creating a successful project through project design, implementation and monitoring. Topics include the roles and responsibilities of a project manager, project members and other stakeholders

MAR1011 (3.0 credit hours)

Introduction to Marketing

Discusses the principles and functions of marketing and its role in a business environment. Utilization of guiding principles of relationship building to establish and maintain trust and confidence in a firm's products and/or services is taught.

MNA4404 (3.0 credit hours)

Management Law and Employee Relations

Discusses federal and state regulations dealing with employment. Topics include wage and hour laws, EEO and affirmative action.

QMB3200 (3.0 credit hours)

Quantitative Approach to Business Decisions

The application of quantitative techniques has added greatly to the depth and the accuracy of critical business decisions in today's complex business environment. This course, coming toward the end of the student's matriculation through the program, is designed to merge the student's acquired qualitative and quantitative skills to address simulated business decision-making applications, utilizing electronic technology and software tools to frame the factors into a spreadsheet format of pragmatic data for quantitative processing and decision-making analysis. Prerequisite: STA3060 or STA 3163

TAX2004 (3.0 credit hours)

Principles of Taxation

Presents an overview of preparation of federal income tax returns emphasizing individual income taxes. Topics include preparation of schedules and forms, review of tax publications and use of the Internal Revenue Service website. Prerequisite: ACG2011

TAX4001 (3.0 credit hours)

Income Tax Accounting

Surveys federal income taxation with emphasis on taxation of individuals and the ethics of income tax accounting. Prerequisite: ACG4111

General Education Requirements

See specific Lower and Upper Division general education requirements for a Bachelor of Arts degree in Accounting in the [Program Descriptions](#) section of this catalog.

PAGE 345, BA PSYCHOLOGY COURSE DESCRIPTIONS

Insert the following before "BACHELOR OF SCIENCE DEGREES":

PSYCHOLOGY

DEP1030 (3.0 credit hours)

Introduction to Cognitive Development

Explores theories of cognition as they relate to human development. Focuses on the behavioral and physiological approaches to cognition. Topics include perception, attention, memory, problem-solving and critical thinking.

PSY1082 (3.0 credit hours)

Introduction to Experimental Psychology

Introduces the process of experimental research in the field of psychology. Focuses on how to locate and analyze empirical research studies. Topics include how to develop, design, and carry out ethical experimental research as well as how to communicate the results of the research.

PSY2023(3.0 credit hours)

Careers and Writing in Psychology

Introduces psychology related careers and emphasizes skills required for scientific writing. Focuses on skills required for library research, writing a psychological paper, analyzing psychological journals, and writing in proper APA style. Topics include strategies to develop career goals, educational goals and a plan of action for meeting those goals.

PSY2206 (3.0 credit hours)

Social Psychology

Presents the field of social psychology. Focuses on human nature, culture, and the importance of relationships in the human race. Topics include social cognition, affect, emotion, and the formation of beliefs and attitudes. Explores interpersonal attraction, exclusion, relationships, sexuality and group interactions.

PSY2214 (3.0 credit hours)

Abnormal Psychology

Explores the theories of psychopathology and abnormal behavior and presents a historical overview of the services provided to individuals with mental illness. Introduces the Diagnostic and Statistical Manual of Mental Disorders along with approaches to assessment, diagnosis and treatment of major psychological disorders.

DEP2280 (3.0 credit hours)

Human Exceptionality

Presents attitudes, beliefs, habits, and community identity as they relate to quality of life. Examines the impact of medical, social, legal, and ethical considerations upon exceptional human beings. Focuses on various human disabilities and challenges while engaging students in critical thought, problem solving, and examination of how scientific and technological advancements have been beneficial to individuals with disabilities.

PSY2314 (3.0 credit hours)

Psychology of Personality

Presents an overview and history of personality theories. Topics include tests, measurements, scoring and interpretation of personality assessments. Emphasizes critical analysis of personality theories, methods and measures.

PSY2450 (3.0 credit hours)

Constructs of Interpersonal Conflict

Examines beliefs, attitudes and behaviors as they relate to conflict and conflict resolution. Focuses on basic skills for resolving interpersonal conflicts. Topics include analysis of problems associated with emotion, gender roles, culture, ethnicity, communication, confidentiality and impartiality in mediation.

CLP3300 (3.0 credit hours)

Concepts of Counseling and Clinical Psychology

Introduces the basic concepts and historical perspectives of counseling and clinical psychology. Emphasizes self-analysis regarding the profession of counseling and personal motives for choosing the profession. Topics include the realities, implications, ethical and legal issues and the formation of an integrated approach to counseling.

EXP3404 (3.0 credit hours)

Principles of Learning

Introduces students to various aspects of learning and behavior including classical conditioning, operant conditioning, reinforcement, observational learning, memory and forgetting. Focuses on critical analysis and application of learning theories to relevant real-life situations.

PSY3309 (3.0 credit hours)

Behavioral Neuroscience

Studies the relationship between the brain and behavior through a detailed examination of the neuron, the brain, and the nervous system. Explores the multiple aspects of human behavior and functioning.

PSY3213 (3.0 credit hours)

Research Methods

Emphasizes the application of the scientific method and research process. Focuses on skills needed to critically analyze published research and develop a hypothetical, ethically sound research proposal.

PSY3336 (3.0 credit hours)

Industrial and Organizational Psychology

Examines the methods, practice, and theories of Industrial and Organizational Psychology, a subfield of psychology in the work place. Topics include job analysis and evaluation, employee motivation, organizational communication, group behavior, conflict resolution and stress management.

DEP3103 (3.0 credit hours)

Child Psychology

Focuses on physical, cognitive, social, and emotional development of children from prenatal development through adolescence. Explores current issues concerning the family, the formation of value systems and problems facing children in contemporary society.

DEP4305 (3.0 credit hours)

Adolescent Psychology

Focuses on physical, cognitive, social, and emotional development that takes place during the adolescent years. Examines the influence of family, peers, school, work, and culture. Topics include current issues in adolescent development concerning autonomy, the formation of identity, intimacy and sexuality, and problems facing adolescence in contemporary society.

DEP4404 (3.0 credit hours)

Psychology of Adult Development and Aging

Uses a biopsychosocial perspective to examine the physical, cognitive, social, and emotional development of young, middle-aged and older adults. Explores issues of gender, culture, socio-economic status, and diversity as they relate to adulthood.

DEP4481 (3.0 credit hours)

Death and Dying

Focuses on people's awareness of their mortality and how death affects life and culture. Examines the stages of death and dying and encourages students to look at their own mortality and reflect upon their lives.

CLP3005 (3.0 credit hours)

Marriage and Family

Focuses on marriage and family dynamics in contemporary society. Explores issues related to parenting, divorce and gender roles. Emphasizes models of communication and conflict resolution.

CLP3314 (3.0 credit hours)

Health Psychology

Presents a survey of health psychology. Topics include behaviors and lifestyles affecting individual health, health enhancement, disease prevention, safety and rehabilitation.

CLP4182 (3.0 credit hours)

Addictive Behaviors

Presents models of understanding addictions and introduces various treatment approaches for addictions. Focuses on the impact of addictions on families and prevention programs.

CLP4390 (3.0 credit hours)

Forensic Psychology

Examines the use of psychology in law enforcement. Studies the roles and responsibilities of forensic psychologists in both violent and non-violent crimes and the court system.

PSY4302 (3.0 credit hours)

Theory, Application, and Evaluation of Tests

Introduces the use of psychological tests and the administration and use of tests in clinical and business settings. Presents various kinds of tests including intelligence, tests of ability and personality. Topics include basic statistics, correlation, reliability and validity in testing.

PSY4830 (3.0 credit hours)

Sports Psychology

Examines the psychological aspects of sport and exercise. Focuses on motivation and goal setting in sport and introduces cognitive and behavioral interventions.

PSY4850 (3.0 credit hours)

Positive Psychology

Presents the identification and application of the psychology of well-being. Topics include the management of emotions, resilience, positive traits, strengths of character, self-regulation and self-control.

PAGE 388, BS SPORTS MANAGEMENT COURSE DESCRIPTIONS

Insert the following before Sports Medicine and Fitness Technology:

SPORTS MANAGEMENT WITH A CONCENTRATION IN GOLF

Bachelor of Science Degree Major Course Requirements

SPM3158 (3.0 credit hours)

Strategies in Sport Management

Provides an introduction to the diverse field of sport management. Topics cover career opportunities within the sport industry and management, marketing, legal, and financial operations of sport organizations.

SPM4025 (3.0 credit hours)

Diversity in Sports

Examines the role and impact that ethnicity, racism, gender, and other diversity topics have had in sport, while providing students with an opportunity to develop an understanding and appreciation for diversity in sport.

SPM4104 (3.0 credit hours)

Facilities and Event Management

Focuses on the factors involved in running and managing athletic events. Topics include maintaining, scheduling, and managing an athletic facility.

SPM4204 (3.0 credit hours)

Ethical Issues in Sports

Examines major ethical issues within sports and introduces students to critical thinking and moral reasoning to make ethical decisions in sports.

SPM4505 (3.0 credit hours)

Sport Finance

Provides an introduction to financial strategies related to sports entities and organizations.

MAN3025 (3.0 credit hours)

Introduction to Management and Organizational Behavior

Introduces managerial principles including planning, organizing, staffing, leadership and control techniques. A behavioral science formulation of individual needs, motivation and group processes is utilized.

ACG3024 (3.0 credit hours)

Accounting for Non-Financial Managers

Addresses the use of accounting information by non-financial managers. Topics include interpretation of accounting information and the language of financial accounting to effectively participate in activities such as planning, investment, control and managerial decision making.

MAN3504 (3.0 credit hours)

Operations Management

Introduces fundamentals of operations management in manufacturing and non-manufacturing sectors. Topics include product and process design, demand forecasting, facilities, facilities layout and location, materials management, inventory management, production planning and quality assurance.

MAN4164 (3.0 credit hours)

Leadership

Introduces students to leadership, research perspectives on leadership, the personal side of leadership, the leader as a relationship builder, and the leader as a social architect.

MAN4583 (3.0 credit hours)

Project Management

Emphasizes the importance of project management and teaches students to differentiate between product and project management. Topics include roles and responsibilities of a project manager, project environment and developing a quality project team, five steps of a project, construction of a network diagram and mathematical analysis techniques such as CPM and PERT.

SPM3110 (3.0 credit hours)

Golfer Development Programs

Focuses on the study of individual techniques, game fundamentals and strategies used in coaching golf and creating golfer improvement and development programs. Topics include skill training, learning styles, effective communication for golf instruction, marketing, revenue management, and staffing.

SPM3115 (3.0 credit hours)

Principles and Science of Coaching

Presents a study of modern techniques and practices used in the coaching of various athletic programs. Covers major areas of focus such as practice, competitive organization, training equipment procurement, budget and finances, ethics, public relations, legal liability, drug abuse, and sports psychology. Analyzes modern trends and issues in athletics as well as examines common philosophical views of athletics as a part of a modern educational curriculum.

SPM3310 (3.0 credit hours)

Golf Marketing

Explores golf industry specific marketing concepts and principles and their practical application. Students will examine risks and challenges golf professionals face to establish a competitive edge within the market. Topics include economics, marketing foundations/functions with emphasis on selling, promotion with a focus on internet and social media, product/service management, pricing and distribution.

SPM4118 (3.0 credit hours)

Technology in Sports Coaching

Explores the use of technology to improve coaching efficiency, strategy, player performance, recruitment, statistical recording and reporting, and long term program design. Addresses technological advances in the mainstream of contemporary culture and their application to coaching.

SPM4128 (3 credit hours)

Human Resource Management for the Golf Professional

Provides a foundational perspective for socially responsible personnel management practices within the golf industry. Special emphasis is placed on the relationship between ethics, moral, legal, and social issues in managing individuals, groups, and the organization within a business environment.

SPM4815 (3.0 credit hours)

Business Law for the Golf Manager

Provides an extensive overview of legal principles and ethical issues in professional sports with specific reference to the role of the golf manager. Topics include an introduction to the different fields of law and a survey of the broad issues related to sports law, an examination of the legal issues routinely faced by golf manager, and a study of the application of ethics in the decision-making process.

PAGE 456, AS RADIATION THERAPY COURSE DESCRIPTIONS

Replace this section with the following:

RAT1001 (5.0 credit hours)

Introduction to Radiation Therapy

Introduces the foundations of radiation therapy with an overview of the profession and the practitioner's role in the healthcare delivery system. Principles, practices and policies of the educational program and professional responsibilities of the radiation therapist will be discussed and examined.

RAT1123 (5.0 credit hours)

Patient Care in Radiation Therapy

Provides the basic concepts of patient care in radiation therapy, and competencies in assessing and evaluating patients undergoing radiation treatment. Patient education and support will also be discussed. Pre-requisite: RAT1001

RAT 2021 (5.0 credit hours)

Principles and Practice of Radiation Therapy I

Content provides knowledge base of radiation therapy equipment, procedures, technique and positioning for treatment localization and delivery. Topics include healthcare delivery systems, basic radiation protection, medical terminology, ethics, medical legal issues, basic patient care, communications, federal and state regulations, accreditation, professional organizations and professional development. Pre-requisite: RAT1123

RAT 2617 (5.0 credit hours)

Radiation Therapy Physics I

Content is designed to provide a broad outline of the physics of ionizing radiation and its medical application in the field of radiation therapy. Addresses concepts and fundamentals of radiation physics and biology standards. Topics include x-ray production, recorded detail, distortion, beam limiting devices, filtration, primary, and secondary

radiation, prime factors, exposure systems, exposure calculations, imaging systems to include analog and digital imaging.. Pre-requisite: RAT2021

RAT 1804 (3.0 credit hours)

Radiation Therapy Clinical Education I

Content is designed to provide sequential development, analysis, integration, synthesis and evaluation of Radiation Therapy concepts and theories in the clinical setting. Through structured, sequential assignments in clinical facilities, concepts of team practice, patient-centered clinical practice and professional development shall be discussed, demonstrated, examined and evaluated. Pre-requisite: RAT2617

RAT 1814 (3.0 credit hours)

Radiation Therapy Clinical Education II

Content is designed to further the sequential development, analysis, integration, synthesis and evaluation of Radiation Therapy concepts and theories in the clinical setting. Through structured, sequential assignments in clinical facilities, concepts of team practice, patient-centered clinical practice and professional development shall be discussed, demonstrated, examined and evaluated. This is a continuation of RAT1804. Pre-requisite: RAT1804

RAT 2241 (5.5 credit hours)

Radiobiology and Pathology

Content discusses the theories and principles of tolerance dose, time dose relationships and the interactions of radiation with cells, tissues and the body as a whole; with an emphasis on etiology, neoplasia, and associated diseases in the radiation therapy patient. Fractionation schemes in the clinical practice of radiation therapy are also discussed. Pre-requisite: RAT1814

RAT 2618 (5.5 credit hours)

Radiation Therapy Physics II

Addresses concepts and fundamentals of radiation physics and biology standards. Topics include x-ray production, recorded detail, distortion, beam limiting devices, filtration, primary and secondary radiation, prime factors, exposure systems, exposure calculations, and imaging systems to include analog and digital imaging. Pre-requisite: RAT2241

RAT 2022 (5.5 credit hours)

Principles and Practice of Radiation Therapy II

A study of cancer from a disease specific perspective. Instruction is provided in different aspects and modalities of cancer treatment and the role and responsibility of the therapist in the process. Identification of structures and location of landmarks using X-rays, CT and MRI scans for simulations will be addressed. Treatment prescription techniques and delivery are also discussed. Pre-requisite: RAT2618

RAT 2657 (4.25 credit hours)

Quality Management

Content focuses on function and protocols for quality improvement and management programs in the radiation therapy department. Topics will include quality control and assurance checks for the clinical aspects of patient care, medical records, treatment delivery, and localization equipment, and treatment planning equipment. The role of various radiation therapy team members in continuous quality improvement will be discussed, as well as the legal and regulatory implications for maintaining appropriate quality care. Pre-requisite: RAT2022

RAT 2804 (3.0 credit hours)

Radiation Therapy Clinical Education III

Provides students with continuing clinical experience in the radiation therapy department to enable completion of competency goals. Instruction is also provided in various treatment set-ups, fabrication and immobilization devices. Pre-requisite: RAT2657

RAT 2814 (3.0 credit hours)

Radiation Therapy Clinical Education IV

Provides students with continuing clinical experience in the radiation therapy department focusing on performance to enable completion of competency goals. Requirements include log-ins and treatment set-ups, fabrication and immobilization under supervision. Pre-requisite: RAT2814

RAT 2652 (4.25 credit hours)

Treatment Planning and Dosimetry

This course is designed to give students an understanding of the factors that influence and govern clinical planning of patient treatment. Optimal treatment planning is emphasized along with particle beams and brachytherapy. Attention is given to the rationale, theory, and calculations for each method. Class demonstrations and projects are incorporated to complement specific content of emerging technologies and their clinical applications. Pre-requisite: RAT2814

RAT 2824 (3.0 credit hours)

Radiation Therapy Clinical Education V

Provides students with continuing clinical experience in the radiation therapy department to enable completion of competency goals. Requirements include log-ins and treatment set-ups, fabrication and immobilization. Pre-requisite: RAT2652

RAT 2834 (3.0 credit hours)

Radiation Therapy Clinical Education VI

Provides students with continuing clinical experience in the radiation therapy department to enable completion of competency goals. Students will demonstrate and document mastery of clinical competencies. Pre-requisite: RAT2824

RAT 2061 (4.0 credit hours)

Radiation Therapy Seminar

This is a capstone course that provides students with the opportunity to explore methods of professional development in the field of radiation therapy. This course provides comprehensive discussion, testing, and refinement of knowledge of all aspects of radiation therapy. /Pre-requisite: All core classes.

PAGE 484-485, COURSE DESCRIPTIONS-GORDON RULE MATH COURSES

Remove any references to the Gordon Rule from the following courses:

- MAC2105 College Algebra
- STA2023 Statistics
- MGF2106 College Mathematics

PAGE 489, ADMISSIONS REQUIREMENTS—DOCTORAL PROGRAMS

Replace this section with the following:

GRADUATE ADMISSIONS REQUIREMENTS

Doctor of Philosophy in Educational Leadership

Doctor of Philosophy in Instructional Design Technology

Doctor of Philosophy in Psychology

Candidates for admission to the Ph.D. program are required to hold a master's degree (or equivalent) from an accredited institution. An admission decision is based on a combination of a student's graduate academic performance, professional experience, letters of recommendation and/or standardized test scores. All students are encouraged to submit Graduate Record Examination (GRE) or Miller Analogy Test (MAT) scores in support of their application.

Required documents for admission are as follows:

- Submission of a completed Graduate School Application
- Submission of an unofficial transcript or copy of a foreign evaluation showing successful completion of a master's degree with a completed Graduate School Application
- Submission of official transcripts or original foreign evaluations showing successful completion of a master's degree from an accredited college or university received within the first semester of enrollment
- Two letters of recommendation received within the first semester of enrollment
- Minimum GRE composite score of 1350 or MAT score at the 40th percentile received within the first semester of enrollment
- Formal resume indicating education and complete work history

Requirement for GRE/MAT scores may be waived for students who meet any one of the following:

- Doctorate from an accredited institution
- Master's degree from an accredited college or university with a grade average of at least 3.2
- Master's degree from an accredited college or university with a grade average of 3.0 or above with a minimum of two years of professional work experience

Failure to provide documentation or test scores or to achieve the grade point average required at the end of the first semester may lead to suspension or dismissal from the University.

PAGE 490, DBA ADMISSIONS REQUIREMENTS

Insert the following before "Master of Arts in Criminal Justice":

Doctor of Business Administration

Candidates for admissions to the DBA program are required to hold a master degree in business administration, management, public or non-profit management, or related fields that demonstrates exposure to managerial functions from an accredited institution, and(2) two years of full-time managerial or professional experience.Or candidates for admission are required to hold a master degree from an accredited institution, at least (3) three graduate credit hours or (6) six undergraduate credits hour in each of the following: accounting, finance, and economics and at least (3) three years and preferably(5) five years of full time managerial or professional experience.An admission decision is based on a combination of a student's graduate academic performance, professional experience, letters of recommendation, and standardized test scores. All students are encouraged to submit Graduate Record Examination (GRE) or Miller Analogy Test (MAT) scores in support of their application.

Required documents for admission are as follows:

- Submission of a completed GraduateSchoolApplication
- Submission of an unofficial transcript or copy of a foreign evaluation showing successful completion of a master's degree with a completed GraduateSchoolApplication
- A one page personal statement describing expectations of the Doctor of Business Administration program with a completed Graduate School Application
- Submission of official transcripts or original foreign evaluations showing successful completion of a master's degree from an accredited college or university received within the first semester of enrollment
- Two letters of recommendation received within the first semester of enrollment
- Minimum GRE composite score of 1350 or MAT score at the 40th percentile received within the first semester of enrollment
- Formal resume indicating education and complete work history

Requirement for GRE/MAT scores may be waived for students who meet any one of the following:

- Doctorate from an accredited institution
- Master degree from an accredited college or university with a grade average of at least 3.2

- Master degree from an accredited college or university with a grade average of 3.0 or above with a minimum of two years of professional work experience

Failure to provide documentation or test scores or to achieve the grade point average required at the end of the first semester may lead to suspension or dismissal from the University.

PAGE 490, EDUCATION SPECIALIST ADMISSION REQUIREMENTS

Insert the following after “DBA ADMISSIONS REQUIREMENTS:

EDUCATION SPECIALIST ADMISSIONS REQUIREMENTS

Education Specialist Degree Program

Required documents for admission are as follows:

- Submission of a completed Graduate School Application
- Submission of an unofficial transcript or copy of a foreign evaluation showing successful completion of a master degree with a completed Graduate School Application
- Submission of official transcripts or original foreign evaluations showing successful completion of a baccalaureate degree from an accredited college or university received within the first semester of enrollment
- Two letters of recommendation received within the first semester of enrollment
- Formal resume indicating education and complete work history

PAGE 492, WAIVER REQUIREMENT FOR MBA 501

Replace the section with the following:

Waiver Requirement for ACG501

Applicants receive test-out credit for ACG501 if they score 155 or higher on the ETS major field examination in business or possess a bachelor’s degree in a business-related discipline with a grade average of at least a 2.70 on a 4.0 scale.

PAGE 493, GRADUATE ADMISSIONS REQUIREMENTS, MS INFORMATION SECURITY

Insert the following above Master of Science in Nursing:

Master of Science in Information Security

An admission decision is based on a combination of a student’s undergraduate academic performance, letters of recommendation, and personal declaration statement.

Admission Requirements:

- Baccalaureate degree in an IT related computer discipline from an accredited university

Required documents for admission are as follows:

- Submission of a completed Graduate School Application
- Submission of an unofficial transcript or copy of a foreign evaluation showing successful completion of a bachelor’s degree in an IT related discipline with the completed Graduate School Application
- A minimum undergraduate GPA of 2.7 or higher
- A one page personal statement describing your intent to pursue the Masters Degree in Information Security program included with the completed Graduate School Application
- Submission of official transcripts or original foreign evaluations showing successful completion of a bachelor’s degree in an IT related computer discipline from an accredited college or university within the first semester of enrollment
- Two letters of recommendation from professional references in the IT field

- Current resume indicating education and complete work history

Additional Requirements for Master of Science in Information Security

To earn a Master of Science in Information Security from Keiser University, students must accomplish the following:

- Earn a minimum of 36.0 graduate semester credit hours
- Earn a minimum grade average of 3.0
- Have no more than two courses with a grade of “C”
- Complete the final 30 credits of the MSIS program through Keiser University
- Complete all MSIS degree requirements within five years of beginning coursework; exceptions for extenuating circumstances reviewed by the Graduate School Dean
- Complete all required core and elective courses including the final capstone-based project.

PAGE 493, GRADUATE ADMISSIONS REQUIREMENTS, MS MANAGEMENT

Master of Science in Management Degree Program

Candidates for admission to the Master of Science in Management program are required to hold a four-year baccalaureate degree (or equivalent) from an accredited institution. An undergraduate degree in management is not a requirement; qualified students from all backgrounds are encouraged to submit applications. An admission decision is based on a combination of a student’s undergraduate and/or graduate academic performance, professional experience, letters of recommendation and/or standardized test scores. All students are encouraged to submit Graduate Record Examination (GRE) or Miller Analogy Test (MAT) scores in support of their application.

Required documents for admission are as follows:

- Submission of a completed Graduate School Application
- Submission of an unofficial transcript or copy of a foreign evaluation showing successful completion of a bachelor degree with a completed Graduate School Application
- Submission of official transcripts or original foreign evaluations showing successful completion of a baccalaureate degree from an accredited college or university received within the first semester of enrollment
- Two letters of recommendation received within the first semester of enrollment
- Formal resume indicating education and complete work history
- Minimum GRE composite score of 1350 or MAT score at the 40th percentile received within the first semester of enrollment

Requirement for GRE/MAT scores may be waived for students who meet any one of the following:

- Graduate degree from an accredited institution
- Undergraduate degree from an accredited college or university with a grade average of at least 3.0
- Undergraduate degree from an accredited college or university with a grade average of 2.7 or above with a minimum of two years of professional work experience
- Completion of the first semester of enrollment with a minimum grade average of 3.0.

PAGE 497, TUITION, FEES, AND OTHER COSTS—GRADUATE SCHOOL

Delete the following:

Tuition Charge per Semester for Life Experience Credit

Tuition charge for life experience course is 25% of normal tuition for a semester.

PAGE 498, GRADUATE SATISFACTORY ACADEMIC PROGRESS

Replace the academic year definition with the following:

An academic year is defined as two semesters equivalent to 32 weeks of instruction and at least 18 semester hours.

PAGE 499, GRADUATE SCHOOL, UNIVERSITY WITHDRAWAL

Replace this section with the following policy:

University Withdrawal Policy

When a student withdraws from Keiser University, oral or written notice should be given to the Dean of the Graduate School by the student, parent or guardian. Such notice should contain the reason for the withdrawal.

The student has a responsibility to notify the University of their intent to withdraw and indicate the date of the withdrawal. If the student plans to return to school, this should be indicated to the Dean of the Graduate School during this process.

A student who withdraws and does not notify the University of their intent to return must be withdrawn within 14 days of the last date of attendance. In addition, any student who has not attended class within 14 days must be withdrawn.

The above policy will affect the student's grade based on the following:

- Withdrawal prior to 50% completion of the course, a grade of W will be assigned.
- Withdrawal after 50% completion of the course, a grade of F will be assigned.

PAGE 500, GRADING POLICY—GRADUATE SCHOOL

Replace the rest of this section after the first paragraph with the following:

Letter Grade	Interpretation	Numerical Value	Numeric Grade
A	Excellent	4.0	90 - 100%
B	Good	3.0	80 - 89%
C	Average	2.0	70 - 79%
F	Failing	0.0	Less than 70%
P	Pass	Not Computed	
LP	Limited Progress	Not Computed	
RC	Residency Complete		
RNC	Residency Not Completed		
AU	Audit	Not Computed	
I	Incomplete	Not Computed	
W	Withdrawal	Not Computed	(prior to 50% completion)
WF	Withdrawal Failing	0.0	(after 50% completion)
WNA	Withdrawal/ No Attendance	Not Computed	
T	Transfer Credit	Not Computed	

Grades are posted online at the end of each term. Students receiving an Incomplete in any subject must meet with their instructor to discuss satisfactory arrangements to fulfill course requirements. Course assignments for an Incomplete must be completed within four (4) weeks of the beginning of the next term. Exceptions to this policy must be approved by the Dean of the Graduate School. Failure to complete the work within this four-week time period will, without administrative approval, result in a failing grade.

Dissertation grades for Doctor of Philosophy degree programs, Pass, Fail, and Limited Progress, are awarded at the end of every dissertation course block. Limited Progress grades are awarded when a doctoral candidate successfully completes all but one course benchmarks with the expectation that the remaining benchmark can be completed within two weeks. Exceptions to this policy must be approved by the Dean of the Graduate School.

Dissertation grades for Doctor of Business Administration degree programs, Pass, Fail, and Progressing, are awarded at the end of every dissertation course. Progressing grades are awarded in dissertation courses that are not complete within one term. Progressing grades will be changed to Pass or Failing pending completion of course benchmarks within required time limits. Exceptions to this policy must be approved by the Dean of the Graduate School.

PAGE 501, GRADUATE SCHOOL GRADUATION REQUIREMENTS

Replace this section with the following:

GRADUATION REQUIREMENTS

Graduate Degrees

Requirements for Doctor of Philosophy in Educational Leadership, Instructional Design and Technology, or Psychology

To earn a Doctor of Philosophy degree from Keiser University, students must accomplish the following:

- Earn a minimum of 60 graduate semester credit hours
- Earn a minimum grade average of 3.0
- Have no more than two courses with a grade of “C”
- Complete the final 54 credits of the PhD program through Keiser University
- Complete all PhD degree requirements within eight years of beginning coursework; exceptions for extenuating circumstances reviewed by the Dean of the Graduate School
- Complete a one week residency before the end of the first calendar year
- Complete a three day residency before the comprehensive examination (PhD in Psychology only)
- Successfully complete a comprehensive examination prior to advancing to candidacy
- Advance to candidacy prior to entering into dissertation courses
- Maintain active student status until dissertation is approved
- Complete a proposal approved by a dissertation committee
- Successfully defend the proposal
- Complete a dissertation approved by a dissertation committee
- Successfully defend the dissertation

Requirements for Education Specialist in Educational Leadership or Education Specialist in Instructional Design and Technology

To earn an Education Specialist degree from Keiser University, students must accomplish the following:

- Earn a minimum of 30 graduate semester credit hours
- Earn a minimum grade average of 3.0
- Have no more than two courses with a grade of “C”
- Complete the final 24 credit hours of the EdS program through Keiser University
- Complete all EdS requirements within five years of beginning coursework; exceptions for extenuating circumstances reviewed by the Graduate School Dean
- Successfully complete a Comprehensive Examination upon completion of 30 graduate semester credit hours

Requirements for Master of Business Administration

To earn a Master of Business Administration degree from Keiser University, students must accomplish the following:

- Earn a minimum of 42 graduate semester credit hours
- Earn a minimum grade average of 3.0
- Have no more than two courses with a grade of “C”
- Complete the final 36 credits of the MBA program through Keiser University
- Complete all MBA degree requirements within five years of beginning coursework; exceptions for extenuating circumstances reviewed by the Dean of the Graduate School

Requirements for Master of Science in Education and Master of Arts in Criminal Justice

To earn a Master of Science or Master of Arts from Keiser University, students must accomplish the following:

- Earn a minimum of 36 graduate semester credit hours
- Earn a minimum grade average of 3.0
- Have no more than two courses with a grade of “C”
- Complete the final 30 credits of the program through Keiser University
- Complete all degree requirements within five years of beginning coursework; exceptions for extenuating circumstances reviewed by the Dean of the Graduate School

Requirements for Master of Science in Physician Assistant

To earn a Master of Science in Physician Assistant degree from Keiser University, students must accomplish the following:

- Earn a minimum of 138 graduate semester credit hours
- Earn a minimum grade average of 3.0
- Complete all credits of the MSPA program through Keiser University
- Complete all MSPA degree requirements within two years of beginning coursework; exceptions for extenuating circumstances reviewed by the Dean of the Graduate School
- Register for the Physician Assistant National Certification Examination (PANCE) prior to completing the last course.

Graduate Business Certificate Program

To earn a Graduate Business Certificate from Keiser University, students must accomplish the following:

- Earn a minimum of 18 graduate semester credit hours
- Earn a minimum grade average of 3.0
- Have no more than two courses with a grade of “C”
- Complete all 18 credit hours through Keiser University

PAGE 502, EDUCATION SPECIALIST GRADUATION REQUIREMENTS

Insert the following after “Additional Requirements for Ph.D. in Education”:

GRADUATION REQUIREMENTS

Education Specialist in Educational Leadership or Education Specialist in Instructional Design and Technology

To earn an Education Specialist degree from Keiser University, students must accomplish the following:

- Earn a minimum of 30 graduate semester credit hours
- Earn a minimum grade average of 3.0
- Have no more than two courses with a grade of “C”
- Complete the final 24 credit hours of the EdS program through Keiser University
- Complete all EdS requirements within five years of beginning coursework; exceptions for extenuating circumstances reviewed by the Graduate School Dean

- Successfully complete a Comprehensive Examination upon completion of 30 graduate semester credit hours

Insert the following before “Additional Requirements for Master of Business Administration”:

Requirements for Doctor of Business Administration degree program.

To earn a Doctor of Philosophy degree from Keiser University, students must accomplish the following:

- Earn a minimum of 60 graduate semester credit hours
- Earn a minimum grade average of 3.0
- Have no more than two courses with a grade of “C”
- Complete the final 54 credits of the DBA program through Keiser University
- Complete all DBA degree requirements within eight years of beginning coursework; exceptions for extenuating circumstances reviewed by the Graduate School Dean
- Students will complete (2) two residencies, the initial residency in the first year and the subsequent residency after passing the comprehensive examination. Students will complete the business foundation courses, research courses, and comprehensive examination prior to beginning dissertation courses.
- Successfully complete a comprehensive examination prior to advancing to candidacy
- Advance to candidacy prior to entering into dissertation courses
- Maintain active student status until dissertation is approved
- Complete a proposal approved by a dissertation committee
- Successfully defend the proposal
- Complete a dissertation approved by a dissertation committee
- Successfully defend the dissertation

PAGE 503, ADDITIONAL REQUIREMENTS – MS MANAGEMENT

Insert the following BEFORE the section on MS Physician Assistant:

Additional Requirements for Master of Science in Management

To earn a Master of Science in Management from Keiser University, students must accomplish the following:

- Earn a minimum of 33 graduate semester credit hours
- Earn a minimum grade average of 3.0
- Have no more than two courses with a grade of “C”
- Complete the final 27 credits of the program through Keiser University
- Complete all degree requirements within five years of beginning coursework; exceptions for extenuating circumstances reviewed by the Dean of the Graduate School
